**Making the Soviet Intelligentsia** Benjamin Tromly, 2013-12-19 Making the Soviet Intelligentsia explores the formation of educated elites in Russian and Ukrainian universities during the early Cold War. In the postwar period, universities emerged as training grounds for the military industrial complex, showcases of Soviet cultural and economic accomplishments, and valued tools in international cultural diplomacy. However, these famed Soviet institutions also generated conflicts about the place of intellectuals and higher learning under socialism. Disruptive party initiatives in higher education, from the xenophobia and anti-Semitic campaigns of late Stalinism to the rewriting of history and the opening of the USSR to the outside world under Khrushchev, encouraged students and professors to interpret their commitments as intellectuals in the Soviet system in varied and sometimes contradictory ways. In the process, the social construct of intelligentsia took on divisive social, political, and national meanings for educated society in the postwar Soviet state.

### **The Russian Intelligentsia**

Sibelan Forrester, Olga Partan, 2025-04-29 The Russian intelligentsia is the historic phenomenon of an educated opposition, and it has provoked a substantial body of Russian and Western publications. This book focuses on the intelligentsia's Myth, Mission, and Metamorphosis as discovered in literature, journalism, and theater. The chapters define essential elements of the myth of the intelligentsia as a distinctive social group and a spiritual formation claiming high moral standards and expectations for the self and for society. Second contributions explore how the intelligentsia sees its mission on various historical stages as inextricably linked with Russia's and the Soviet Union's cultural destiny, especially its literary and other artistic creations. Finally, the volume addresses the metamorphosis of the intelligentsia over centuries as socio-political factors shaped its persistence and its perpetual transformation.

**Stalin** Christopher Read, 2016-12-08 This new biography of Stalin offers an accessible and up-to-date representation of one of the twentieth century's defining figures, as well as new insights, analysis, and illumination to deepen our understanding of his actions, intentions, and the nature of the power that he wielded. Christopher Read examines Stalin's contribution to and impact on Russian and world events in the first half of the twentieth century. The biography brings together the avalanche of sources and scholarship which followed the collapse of the system Stalin constructed, including the often neglected writings and speeches of Stalin himself. In addition to a detailed narrative and analysis of Stalin's rule, chapters also cover his early years and humble beginnings in a small town at a remote outpost of the Russian Empire, his role in the revolution, his relationships with Lenin, Trotsky, and others in the 1920s, and his rise to become one of the most powerful figures in human history. The book closes with an account of Stalin's afterlife and legacy, both in the immediate aftermath of his death and in the decades since. This concise account of Stalin's life is the perfect introduction for students of modern Russian history.

Robertson, Jenny J. Lee, 2025-10-31 World Yearbook of Education 2026 discusses the shifting geopolitics of Higher Education directly engaging with an urgent call to theorize the academy as a site of power politics protest and possibility The volume brings together leading and new generations of thinkers from across the globe who draw on theoretical resources from sociology politics international relations geography gender studies cultural studies and post and decolonial studies Taken together the chapters show how these epistemic resources can help us understand the current state of affairs in higher education and beyond They reflect key dimensions of shifting geopolitics and their impact on higher education multipolar superpower rivalry autocratic populism decolonial justice and digital transformations By anchoring the

study of higher education in prevailing geopolitical tensions the volume seeks to uncover the critical role of the university in contemporary global politics By exploring higher education as a central institution caught within competing visions of world order one rooted in international cooperation another asserting the nation state and yet another challenging the very notion of the university as territorially fixed the book offers a perspective on the university which is in line with pivotal global developments It is a must read book for anyone interested in the new geopolitics of higher education and the future of the university globally

*Reconstructing Lenin* Tamás Krausz, 2015-02-27 Vladimir Ilyich Lenin is among the most enigmatic and influential figures of the twentieth century While his life and work are crucial to any understanding of modern history and the socialist movement generations of writers on the left and the right have seen fit to embalm him endlessly with superficial analysis or dreary dogma Now after the fall of the Soviet Union and actually existing socialism it is possible to consider Lenin afresh with sober senses trained on his historical context and how it shaped his theoretical and political contributions *Reconstructing Lenin* four decades in the making and now available in English for the first time is an attempt to do just that Tam s Krausz an esteemed Hungarian scholar writing in the tradition of Gy rgy Luk cs Ferenc Tokei and Istv n M sz ros makes a major contribution to a growing field of contemporary Lenin studies This rich and penetrating account reveals Lenin busy at the work of revolution his thought shaped by immediate political events but never straying far from a coherent theoretical perspective Krausz balances detailed descriptions of Lenin s time and place with lucid explications of his intellectual development covering a range of topics like war and revolution dictatorship and democracy socialism and utopianism *Reconstructing Lenin* will change the way you look at a man and a movement it will also introduce the English speaking world to a profound radical scholar

*The Art and Science of Making the New Man in Early 20th-Century Russia* Yvonne Howell, Nikolai Kremmentsov, 2021-12-02 The idea that morally mentally and physically superior new men might replace the currently existing mankind has periodically seized the imagination of intellectuals leaders and reformers throughout history This volume offers a multidisciplinary investigation into how the new man was made in Russia and the early Soviet Union in the first third of the 20th century The traditional narrative of the Soviet new man as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here The book focuses on the interplay between the rapidly developing experimental life sciences such as biology medicine and psychology and countless cultural products ranging from film and fiction dolls and museum exhibits to pedagogical projects sculptures and exemplary agricultural fairs With contributions from scholars based in the United States Canada the UK Germany and Russia the picture that emerges is emphatically more complex contradictory and suggestive of strong parallels with other new man visions in Europe and elsewhere In contrast to previous interpretations that focused largely on the apparent disconnect between utopian new man rhetoric and the harsh realities of everyday life in the Soviet Union this volume brings to light the surprising historical trajectories of new man visions their often obscure origins acclaimed and forgotten champions

unexpected and complicated results and mutual interrelations In short the volume is a timely examination of a recurring theme in modern history when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind

reader of this book of the intense subjectivity that inevitably permeates autobiography hence he writes he offers this account of his life as he understood it and as he would like others to believe it to have been Certainly while Dr Du Bois was deep in his ninth decade when he died longevity was the least remarkable feature of his life As editor author lecturer scholar organizer inspirer and fighter he was among the most consequential figures of the twentieth century Necessarily therefore the full and final accounting of that life and his times becomes an indispensable volume
