

Important Characteristics of the US Healthcare System

Today, we want to have a look at the characteristics of the American healthcare system so you can understand the basics of how it works. Some of these things may be changing slowly but surely and some may be addressed by the Affordable Care Act.

1. **Privately Governed:** The US healthcare system is not governed by a central agency. Instead, there are several privately owned hospitals, practices, and clinics which all work on their own.
2. **Technology-Focused:** Our health system is very focused on technology for healthcare. This is not really a bad thing as it means that we have the best kinds of procedures and equipments to offer our patients.
3. **Limited Access:** Not everyone has easy access to healthcare. Healthcare is part of human rights and it is a necessity for us to live and stay healthy. However, the way our system works makes it difficult for some people to have access to this basic necessity.
4. **Legal Risks:** In America, people have come to believe that they can sue anyone who does them wrong no matter how big or small the issue. We are very quick to bring about lawsuits against those that we feel wronged us.

An Introduction to the US Health Care Industry David S. Guzik, 2020-10-13 Why does US health care have such high costs and poor outcomes Dr David S Guzik offers this critique of the American health care industry and argues that it could work more effectively by rebalancing care cost and access For decades the United States has been faced with a puzzling problem Despite spending much more money per capita on health care than any other developed nation its population suffers from notoriously poorer health In comparison with 10 other high income nations in fact the US has the lowest life expectancy at birth the highest rates of infant and neonatal mortality and the most inequitable access to physicians when adjusted for need In An Introduction to the US Health Care Industry Dr David S Guzik takes an in depth look at this troubling issue Bringing to bear his unique background as a physician economist former University of Rochester medical school dean and former president of the University of Florida Health System Dr Guzik shows that what we commonly refer to as the US health care system is actually an industry forged by a unique collection of self interested and disjointed stakeholders He argues that the assumptions underlying well functioning markets do not align with health care The resulting market imperfections combined with entrenched industry stakeholders have led to a significant imbalance of care cost and access Using a nontechnical framework Dr Guzik introduces readers to the economic principles behind the function and dysfunction of our health care industry He shows how the market based approach could be expected to remedy these problems while detailing the realities of imperfections regulations and wealth inequality on those functions He also analyzes how this industry developed presenting the conceptual underpinnings of the health care industry while detailing its history and tracing the creation and

entrenchment of the current federation of key stakeholders government insurance companies hospitals doctors employers and drug and device manufacturers In the final section of the book Dr Guzik looks to the future describing the prevention innovation and alternative financing models that could help to rebalance the priorities of care cost and access that Americans need An online supplement on COVID 19 is available as is a discussion guide for instructors To access this supplemental material please visit www.jhupbooks.press.jhu.edu **The Myths of Health Care** Paola Adinolfi, Elio Borgonovi, 2017-10-25
