The Myth of Mirror Neurons: The Real Neuroscience of Communication and Cognition Gregory Hickok, 2014-08-18 An essential reconsideration of one of the most far reaching theories in modern neuroscience and psychology In 1992 a group of neuroscientists from Parma Italy reported a new class of brain cells discovered in the motor cortex of the macaque monkey These cells later dubbed mirror neurons responded equally well during the monkey s own motor actions such as grabbing an object and while the monkey watched someone else perform similar motor actions Researchers speculated that the neurons allowed the monkey to understand others by simulating their actions in its own brain Mirror neurons soon jumped species and took human neuroscience and psychology by storm In the late 1990s theorists showed how the cells provided an elegantly simple new way to explain the evolution of language the development of human empathy and the neural foundation of autism In the years that followed a stream of scientific studies implicated mirror neurons in everything from schizophrenia and drug abuse to sexual orientation and contagious yawning In *The Myth of Mirror Neurons* neuroscientist Gregory Hickok reexamines the mirror neuron story and finds that it is built on a tenuous foundation a pair of codependent assumptions about mirror neuron activity and human understanding Drawing on a broad range of observations from work on animal behavior modern neuroimaging neurological disorders and more Hickok argues that the foundational assumptions fall flat in light of the facts He then explores alternative explanations of mirror neuron function while illuminating crucial questions about human cognition and brain function Why do humans imitate so prodigiously How different are the left and right hemispheres of the brain Why do we have two visual systems Do we need to be able to talk to understand speech What s going wrong in autism Can humans read minds *The Myth of Mirror Neurons* not only delivers an instructive tale about the course of scientific progress from discovery to theory to revision but also provides deep insights into the organization and function of the human brain and the nature of communication and cognition

Nurturing Natures Graham Music, 2024-01-24 This new edition of the bestselling text *Nurturing Natures* provides an indispensable synthesis of the latest scientific knowledge about children s emotional development Integrating a wealth of both up to date and classical research from areas such as attachment theory neuroscience developmental psychology and cross cultural studies it weaves these into an accessible enjoyable text that always keeps in mind children recognisable to academics practitioners and parents New to this edition the book considers transgender issues same sex parenting experiences of black and minority ethnic groups well being and the impact of mental health in relation to climate change anxiety It looks at key developmental stages from life in the womb to the preschool years and right up until adolescence examining how children develop language play and memory and moral capacities Issues of nature and nurture are addressed and the effects of different kinds of early experiences are unpicked creating a coherent and balanced view of the developing child in context *Nurturing Natures* is written by an experienced child therapist who has used a wide array of research from different disciplines to create a highly readable and

Violence and the Mimetic Unconscious, Volume 2 Nidesh Lawtoo, 2023-10-01 Representations of violence have subliminal contagious effects but what kind of unconscious captures this imperceptible affective dynamic in the digital age In volume two of a Janus faced diagnostic of the cathartic and contagious effects of new media violence Nidesh Lawtoo traces a genealogy of a long neglected embodied relational and highly mimetic unconscious that well before the discovery of mirror neurons posited mirroring reactions as a via regia to a phantom ego Rather than being the product of a solipsistic discovery the unconscious turns out to have haunted philosophers psychologists and artists for a long time This book proposes a genealogy of untimely philosophical physicians that goes from Plato to Nietzsche Bernheim to F r Freud to Bataille Arendt to Girard affect theory to the neurosciences In their company Lawtoo promotes the transdisciplinary field of mimetic studies by reevaluating the unconscious actions and reactions of homo mimeticus As a new theory of mimesis emerges Violence and the Mimetic Unconscious offers a searching diagnosis as to why the pathos of new media violence from film to video games police murders to the storming of the U S Capitol continues to cast a material shadow on the present and future

Neurosociology: A New Field for Transdisciplinary Social Analysis Gennaro Iorio, Rosalba Morese, Rudina Rama, Vincenzo Auriemma, 2022-05-26 Percy Shelley for Our Times Omar F. Miranda, Kate Singer, 2024-03-14 Two centuries after Percy Shelley s death his writings continue to resonate in remarkable ways Shelley addressed climate change women s liberation nonbinary gender and political protest while speaking to Indigenous queer trans disabled displaced and working class communities He still inspires artists and social justice movements around the world today Yet Percy Shelley for Our Times reveals an even more farsighted writer one whose poetic methodology went beyond the didactic powers of prophetic art Not historicist presentist or transhistorical Shelley for our times conceives worlds outside himself his poetry

and his era envisioning how audiences connect and collaborate across space and time This collection revitalizes a writer once considered an adolescent of idealist protest showing how his interwoven poetics of relationality continually revisits the meaning of community and the contemporary This title is part of the Flip it Open programme and may also be available Open Access Check our website Cambridge Core for details *René Girard, Theology, and Pop Culture* Ryan G. Duns, T. Derrick Witherington, 2021-08-10 In *René Girard Theology and Popular Culture* fifteen contributors consider how Girard's mimetic theory can be used to uncover and probe the theological depths of popular culture Creative and critical engagement with Girard's theory enables the contributors to offer fresh and exciting interpretations of movies *The Devil Wears Prada* *Mean Girls* *Star Wars* television *Hoarders* *Cobra Kai* classical literature and graphic novels and issues ranging from anorexia to social media The result is a volume that establishes Girard as an innovative interpreter of culture and shows him as an invaluable guide for theologically reflecting on desire violence redemption and forgiveness Written in fresh and lively prose the contributors demonstrate not only that Girard provides a powerful lens through which to view culture but also and more provocatively challenge readers to consider what popular culture reveals about them Readers looking for an accessible introduction to mimetic theory and exploring its theological application will find this a welcome resource *Environmental Guilt and Shame* Sarah E. Fredericks, 2021 This study shows that many people in the US feel guilt about their everyday life It explores many ethical questions including whether individuals or collectives are the guilty or shameful parties whether agents should have these feelings whether people should induce guilt or shame in others and how people can respond to such feelings *LO: TECH: POP: CULT* Priscilla Guy, Alanna Thain, 2024-04-24 This edited collection assembles international perspectives from artists academics and curators in the field to bring the insights of screendance theory and practice back into conversations with critical methods at the intersections of popular culture low tech media practices dance and movement studies and the minoritarian perspectives of feminism queer theory critical race studies and more This book represents new vectors in screendance studies featuring contributions by both artists and theoreticians some of the most established voices in the field as well as the next generation of emerging scholars artists and curators It builds on the foundational cartographies of screendance studies that attempted to sketch out what was particular to this practice Sampling and reworking established forms of inquiry artistic practice and spectatorial habits and suspending and reorienting gestures into minoritarian forms these conversations consider the affordances of screendance for reimagining the relations of bodies technologies and media today This collection will be of great interest to students and scholars in dance studies performance studies cinema and media studies feminist studies and cultural studies **Nothing But Noise** Zachary Wallmark, 2022 *Nothing but Noise* Timbre and Musical Meaning at the Edge explores how timbre shapes musical affect and meaning Integrating perspectives from musicology with the cognitive sciences author Zachary Wallmark advances a novel model of timbre interpretation that takes into account the bodily sensorimotor dynamics of sound production and perception The

contribution of timbre to musical experience is clearest in drastic situations where meaning is itself contested that is in polarizing contexts of reception where evaluation of musical timbre by some listeners collides headlong against a competing claim that it is just noise Taking this ubiquitous moment as a starting point the book explores affect reception and timbre semantics through diverse cultural historical case studies that frustrate the acoustic and perceptual boundary between musical sound and noise Nothing but Noise includes chapters on the racial and gender politics in the reception of free jazz saxophone screaming in the late 1960s an analysis of contested timbral ideals in the performance practices of the Japanese shakuhachi flute and an historical examination of the overlooked role of brutal timbres in the moral panic over heavy metal in the eighties and nineties The book closes with a discussion of the slippery social fault lines separating perceptions of musical sound from noise and the ethical stakes of encountering another's aural face

Wiggen Karterud,2023-03-03 **Human Traces: Ephemeral Art** Marilyn Ekdahl Ravicz,2020-02-07 From archaic ochre marks on stones and Paleolithic cave murals of animals and hunters to modern art museums humans have created many styles and forms of visual art Some were created to enjoy and others to enhance social occasions after which they were discarded or destroyed Ephemeral art or durable it never mattered if it was aesthetic This is the first comprehensive study of ephemeral visual art an heir of the human evolutionary background that made it possible for us to create and appreciate art Ephemeral artworks still permeate life and this study honors their heritage

Toward Human-Level Artificial Intelligence

Eitan Michael Azoff,2024-09-18 Is a computer simulation of a brain sufficient to make it intelligent Do you need consciousness to have intelligence Do you need to be alive to have consciousness This book has a dual purpose First it provides a multi disciplinary research survey across all branches of neuroscience and AI research that relate to this book's mission of bringing AI research closer to building a human level AI HLA system It provides an encapsulation of key ideas and concepts and provides all the references for the reader to delve deeper much of the survey coverage is of recent pioneering research Second the final part of this book brings together key concepts from the survey and makes suggestions for building HLA This book provides accessible explanations of numerous key concepts from neuroscience and artificial intelligence research including The focus on visual processing and thinking and the possible role of brain lateralization toward visual thinking and intelligence Diffuse decision making by ensembles of neurons The inside out model to give HLA an inner life and the possible role for cognitive architecture implementing the scientific method through the plan do check act cycle within that model learning to learn A neuromodulation feature such as a machine equivalent of dopamine that reinforces learning The embodied HLA machine a neurorobot that interacts with the physical world as it learns This book concludes by

explaining the hypothesis that computer simulation is sufficient to take AI research further toward HLAi and that the scientific method is our means to enable that progress This book will be of great interest to a broad audience particularly neuroscientists and AI researchers investors in AI projects and lay readers looking for an accessible introduction to the intersection of neuroscience and artificial intelligence *Le cerveau, l'univers dans votre tête* David
