Karen Bogenschneider, 2024-02-23 This new edition captures the evolving post pandemic landscape of family policy the transformational changes that have occurred within contemporary families and the social economic and racial ethnic disparities that have grown across families The book draws on policies from around the globe to make an evidence based case for family policy and its contributions to families and to society Bogenschneider tackles a significant challenge of our times the polarization of politics including why it occurs and how professionals can bridge the divide Beyond the basics the book provides best practices for turning analysis into action by drawing on cutting edge research and a point of view often overlooked in policy books the voice of policymakers themselves Imbued with hope yet fundamentally realistic

Bogenschneider applies a relationship based and strikingly nonpartisan approach for those who want to make a positive difference for families whether they engage local policymakers in towns cities and counties state national lawmakers or decision makers in businesses nonprofits and philanthropy Accompanied by updated web based teaching materials and a family impact toolkit this is core reading for undergraduate and or graduate courses in family or social policy taught in human development and family studies psychology counseling social work sociology public policy political science and education It is also essential reading for professionals and policymakers interested in pursuing better public policy for families in all their diversity across the lifespan      *Social Inequality* Heather M. Fitz Gibbon, Anne M. Nurse, Charles E.

Hurst, 2019-07-02 Like past editions this tenth edition of *Social Inequality Forms Causes and Consequences* is a user friendly introduction to the study of social inequality This book conveys the pervasiveness and extensiveness of social inequality in the United States within a comparative context to show how inequality occurs how it affects all of us and what is being done about it This edition benefits from a variety of changes that have significantly strengthened the text The authors pay increased attention to disability intersectionality immigration religion and place This edition also spotlights crime and the criminal justice system as well as health and the environment The tenth edition includes a new chapter on policy alternatives and venues for social change      *Children of Austerity* Bea Cantillon, Yekaterina Chzhen, Sudhanshu Handa, Brian

Nolan, 2017-04-07 The 2008 financial crisis triggered the worst global recession since the Great Depression Many OECD countries responded to the crisis by reducing social spending Through 11 diverse country case studies Belgium Germany Greece Hungary Ireland Italy Japan Spain Sweden United Kingdom and the United States this volume describes the evolution of child poverty and material well being during the crisis and links these outcomes with the responses by governments The analysis underlines that countries with fragmented social protection systems were less able to protect the incomes of households with children at the time when unemployment soared In contrast countries with more comprehensive social protection cushioned the impact of the crisis on households with children especially if they had implemented fiscal stimulus

packages at the onset of the crisis Although the macroeconomic shock itself and the starting positions differed greatly across countries while the responses by governments covered a very wide range of policy levers and varied with their circumstances cuts in social spending and tax increases often played a major role in the impact that the crisis had on the living standards of families and children

**The Economic Other** Meghan Condon, Amber Wichowsky, 2020-09-22 *Economic inequality* is at a record high in the United States but public demand for redistribution is not rising with it Meghan Condon and Amber Wichowsky show that this paradox and other mysteries about class and US politics can be solved through a focus on social comparison Powerful currents compete to propel attention up or down toward the rich or the poor pulling politics along in the wake Through an astute blend of experiments surveys and descriptions people offer in their own words *The Economic Other* reveals that when less advantaged Americans compare with the rich they become more accurate about their own status and want more from government But American society is structured to prevent upward comparison In an increasingly divided anxious nation opportunities to interact with the country's richest are shrinking and people prefer to compare to those below to feel secure Even when comparison with the rich does occur many lose confidence in their power to effect change Laying bare how social comparisons drive political attitudes *The Economic Other* is an essential look at the stubborn plight of inequality and the measures needed to solve it

**Government-Citizen Disconnect** Suzanne Mettler, 2018-07-03 Americans relationship to the federal government is paradoxical Polls show that public opinion regarding the government has plummeted to all time lows with only one in five

saying they trust the government or believe that it operates in their interest Yet at the same time more Americans than ever benefit from some form of government social provision Political scientist Suzanne Mettler calls this growing gulf between people's perceptions of government and the actual role it plays in their lives the government citizen disconnect In *The Government Citizen Disconnect* she explores the rise of this phenomenon and its implications for policymaking and politics Drawing from original survey data which probed Americans' experiences of 21 federal social policies such as food stamps Social Security Medicaid and the home mortgage interest deduction Mettler shows that 96 percent of adults have received benefits from at least one of them and that the average person has utilized five Overall usage rates transcend social economic and political divisions and most Americans report positive experiences of their policy experiences However the fact that they have benefited from these policies has little positive effect on people's attitudes toward government Mettler finds that shared identities and group affiliations as well as ideological forces are more powerful and consistent influences In particular those who oppose welfare tend to extrapolate their unfavorable views of it to government in general Deep antipathy toward the government has emerged as the result of a conservative movement that has waged a war on social welfare policies for over forty years even as economic inequality and benefit use have increased Mettler finds that voting patterns exacerbate the government citizen disconnect as those holding positive views of federal programs and supporting expanded benefits have lower rates of political participation than those holding more hostile views of the government As a result the loudest political voice belongs to those who have benefited from policies but who give government little credit for their economic well being seeing their success more as a matter of their own deservingness This contributes to the election of politicians who advocate cutting federal social programs According to Mettler the government citizen disconnect frays the bonds of representative government and democracy *The Government Citizen Disconnect* illuminates a paradox that increasingly shapes American politics Mettler's examination of hostility toward government at a time when most Americans will at some point rely on the social benefits it provides helps us better understand the roots of today's fractious political climate

involvement and political activism Each section includes examples and studies conducted in a range of countries exploring how the journey to adulthood can vary according to cultural context as well as individual circumstance The book affirms that while there is great variety in how one transitions to adulthood there is no correct path and most people fare well or even thrive in adulthood Featuring end of chapter summaries quizzes and activities Journeys Through Emerging Adulthood provides an accessible yet comprehensive overview of this significant life stage connecting fundamental psychological theories with modern social phenomena Reifman s text is essential reading for both undergraduate and graduate students of psychology human development and sociology as well as students and researchers of any discipline interested in the path to adulthood

**Laboring in the Shadow of Empire** Celeste Vaughan Curington, 2024-09-13 *Laboring in the Shadow of Empire* Race Gender and Care Work in Portugal examines the everyday lives of an African descendant care service workforce that labors in an ostensibly anti racial Europe and against the backdrop of the Portuguese colonial empire While much of the literature on global care work has focused on Asian and Latine migrant care workers there is comparatively less research that explicitly examines African care workers and their migration histories to Europe Sociologist Celeste Vaughan Curington focuses on Portugal a European setting with comparatively liberal policies around family settlement and naturalization for migrants In this setting rapid urbanization in the late twentieth century along with a national push to reconcile work and family has shaped the growth of paid home care and cleaning service industries Many researchers focus on informal work settings where immigrant rights are restricted and many workers are undocumented or without permanent residence status Curington instead examines workers who have accessed citizenship or permanent residence status and also explores African women s experiences laboring in care and service industries in the formal market revealing how deeply colonial and intersectional logics of a racialized and international division of reproductive labor in Portugal render these women hyper invisible and hyper visible as appropriate workers in Lisbon
