This academic textbook uniquely analyzes the shift in adoption patterns, pricing sensitivities, and the integration of digital learning platforms like learning management systems (LMS). For example, the book looks at how the increasing costs of traditional textbooks are pushing students and faculty toward more affordable learning solutions such as e-books and courseware. The book approaches the topic by blending quantitative data from publisher reports and student surveys with qualitative insights from faculty interviews. It delves into specific areas such as textbook adoption across disciplines and the impact of OER initiatives. The book progresses logically, beginning with an introduction that sets the stage, followed by chapters analyzing data and concluding with implications for the future of textbook development.
