Greenhouse Gas Control Technologies B. Eliasson, P. Riemer, A. Wokaun, 1999-05-20 These proceedings contain 270 papers outlining ideas and contributions to the new scientific technical and political discipline of Greenhouse Gas GHG Control The contributions were presented at the 4th International Conference on Greenhouse Gas Control Technologies GHGT 4 It was the largest gathering of experts active in this new and fast developing field GHGT 4 was different from its predecessors in that it included all greenhouse gases not only CO₂ and all issues which could contribute to the mitigation of the greenhouse problem technical economic and political The main focus was on practical solutions and real demonstrations of mitigation technology being planned and implemented today It also addressed ways to increase the efficiency of power production and utilisation and looked at proposals to encourage the development of renewable energy sources During the Opening Session 10 keynote addresses were heard from prominent personalities in government industry and academia To tackle this very inter disciplinary problem and to achieve acceptable solutions it is essential for industry and government to initiate intense dialogue and cooperation Conferences like this can provide the opportunity for a meeting of minds between engineers and politicians in the face of global challenge The primary attributes of this global challenge are manifold the problem is global and international it is inter disciplinary both in substance and approach it covers technical political and economic issues and involves government science industry and academia it is complex and non linear and it will take the efforts of all parties involved to solve the problem These proceedings contain ideas for starting demonstration projects and for making better use of the power and flexibility of market measures They also show it is a problem we can influence and that there is a wealth of ideas The challenge now is to

find the right partners to put these ideas into action Dispute Settlement Reports 1998: Volume 6, Pages 2199-2752 World Trade Organization,2001-01-25 The authorized paginated WTO Dispute Settlement Reports in English cases for 1998

Crisis, Resilience and Survival Matthias Holweg,Nick Oliver,2015-12-01 Crisis Resilience and Survival charts the evolution of the global automotive industry revealing the pressures and challenges facing firms in this huge but turbulent realm of business Long term overcapacity and swings of the economic cycle mean that many car companies are in financially perilous positions Yet failures of auto companies are rare and many have bounced back from the brink Using the concept of the survival envelope Holweg and Oliver argue that the ability to design develop manufacture and distribute vehicles competitively is not the only factor in ensuring success Using detailed analyses of two failures Rover and Saab and two near misses Chrysler and Nissan they explore how scale market reach and supportive stakeholder relations can make the difference between success and failure in this global industry This book will appeal to anyone working in or studying the auto industry as well as those interested in corporate success and failure *The Mirror* Margaret Safo (Mrs.),2006-12-09

Charging Ahead David Welch,2022-09-20 Mary Barra s quest to move GM to a manufacturer of electric cars has captured the attention of automobile aficionados green business advocates and leaders of all types who have to admire Mary s toughness in moving forward despite the overwhelming obstacles in her path A decade ago no one would have guessed that GM would be the company poised to lead America into the future At a time when business book readers seem endlessly fascinated by soaring tech giants like Amazon and Netflix and ill fated startups like WeWork and Theranos why is it important to put the spotlight back on 112 year old GM Because Charlie Wilson s quip from 1952 is still true What s good for GM is still good for America and vice versa America needs to transition to a new era of clean energy and environmentally sustainable transportation We also need to adapt to a world with far fewer assembly line jobs but far more skilled jobs for people who can design build and operate robots and other high tech machines GM s attempt to lead those transitions is as important as it is dramatic Equally compelling is the story of GM s CEO Mary Barra who against all odds took the reins at GM in 2014 Since that time she has attempted to reinvent a century old company and equip it for the biggest change in transportation since the internal combustion engine replaced the horse In the process she has been ripping out GM traditions by the roots and taking flak from all sides Her plan is to make GM the company famed for the gas burning Corvette hulking Cadillac Escalade and carbon spewing Silverado pickup purely electric and clean by 2035 She may not be as wealthy as Jeff Bezos as brash as Elon Musk or as powerful as Mark Zuckerberg but Mary Barra is just as important as any of them And as one of the most powerful female executives in the world she is overdue for an in depth look at her forward thinking vision her approach to leadership and her accomplishments against the odds **Boy Racer Culture** Karen Lumsden,2013-02-11 On the public roads boy racers are a foreboding presence viewed with suspicion and derision by the respectable motorist The problem of the young male driver is one which has plagued authorities and governments due to youths acclaimed propensity

to engage in deviant and dangerous driving behaviours Boy Racer Culture sheds light on the boy racer phenomenon through ethnographic research with the notorious Bouley Basher culture in the city of Aberdeen Scotland and the moral panic on the part of outside groups including the local community police politicians and media This book examines the creation of masculine and feminine identities in a traditionally male dominated subculture through car related rituals such as modding subcultural media and events and the quest for celebrity status via public performances Boy Racer Culture challenges common misconceptions surrounding the boy racer the problematic young male motorist and the car modifier It will be essential reading for an international audience including sociologists and criminologists particularly those with an interest in youth culture subcultures moral panics car culture anti social behaviour and the governance and policing of the roads

Political Pressure, Rhetoric and Monetary Policy Philipp Maier, 2002-01-01 Philipp Maier offers an examination of the extent to which governments and various interest groups have exerted pressure on central banks The book looks in particular at the Deutsche Bundesbank which acted as the blueprint for the European Central Bank ECB and utilizes an original set of indicators to measure external pressure and support from the government and other institutions
