Autocar & Motor , 1992-04

Car Guys vs. Bean Counters Bob Lutz, 2013-05-28 One of the most acute books about management and how companies work in practice that I have read in a long time If anyone wants to know exactly how the U S auto industry got into trouble here is your guide John Gapper FINANCIAL TIMES When Bob Lutz got into the auto business in the early 1960s CEOs knew that if you captured the public's imagination with innovative car design and top quality craftsmanship the money would follow The car guys held sway and GM dominated with bold creative leadership and iconic brands like Cadillac Buick Pontiac Oldsmobile GMC and Chevrolet But then GM's leadership began to put its faith in numbers and spreadsheets Determined to eliminate the waste and personality worship of the bygone creative leaders management got too smart for its own good With the bean counters

firmly in charge carmakers and much of American industry lost their single minded focus on product excellence and their competitive advantage Decline soon followed In 2001 General Motors hired Lutz out of retirement with a mandate to save the company by making great cars again As vice chairman he launched a war against the penny pinching number crunchers who ran the company by the bottom line and reinstated a focus on creativity design and cars and trucks that would satisfy GM's customers Lutz's commonsense lessons combined with a generous helping of fascinating anecdotes will inspire readers in any industry
