Operationalizing Sustainability Innovation Entrepreneurship And Management:

Operationalizing Sustainability Pierre Massotte, Patrick Corsi, 2015-10-19 This book focuses on the emergence of the science of sustainability and the key concepts in making sustainability operational in an organization. The authors discuss the methods, techniques, and tools needed to manage the impact of sustainability and how these can be reformulated into business models and solutions for new growth and applications. They then move onto the reformulation of future thinking processes before ending by looking towards an approach for the measurement of sustainability and competitiveness.

Entrepreneurial Ecosystems Sophie Boutillier, Denis Carré, Nadine Levratto, 2016-05-09 In today's rapidly changing business landscape, entrepreneurship is growing and actively promoted by policy makers. Several reports explore the influence of entrepreneurship on the economy and put some emphasis on its positive influence: GDP, per capita unemployment, and exports. However, entrepreneurship does not go per se, and it is now broadly admitted that the decision of the entrepreneur is narrowly connected with its environment, the so-called entrepreneurial ecosystem. This book shows why policymakers, entrepreneurship supporters, and entrepreneurs themselves should keep in mind the locally structured nature of entrepreneurial networks. Even if the notion of Entrepreneurial Ecosystem has become quite popular among the international organization, development agencies, and public administrations, this concept is often considered as a new one having its origins in very recent publications. This book aims at showing that entrepreneurial ecosystems have their roots in the history of economic thought and that scholars have long been conscious of their importance. Instead of insisting upon the diversity of agents involved in these organizations, it also puts some emphasis on the importance of the linkages and sharing between them and suggests some orientations in view of a performing evaluation system.

Learning about Social Entrepreneurship and Management in Times of Social Transformation Luise Li Langergaard, Katia Dupret, Jennifer Eschweiler, 2024-01-01 The book brings together perspectives on entrepreneurship research, education, and practice to understand social entrepreneurship in its wider societal, political, and economic context. Its unique contribution comes from its interdisciplinary approach that spans from the societal to the organizational level, with specific focus on social innovation and management. It views management of social entrepreneurship and social enterprise in light of its societal context and employs social innovation to critically assess social entrepreneurship as a driver of change. The emergence of social entrepreneurship as an academic field is linked to several societal trends, such as public austerity, financial crises, new social challenges, and a growing counter-movement to globalised capitalism. Generally seen as organisations serving both social and economic objectives, social enterprises, social innovation, and social entrepreneurship have their roots in civil society, civic activism, or the solidarity economy, but also manifest themselves as for-profit companies with new organisational forms emerging and old ones changing. The contributions in this book elucidate these developments and the role of social entrepreneurs and social enterprises. Furthermore, the book offers great insight into the specific ways of managing leading

and creating innovation in social enterprises as well as perspectives on how to understand their social impact or value creation

Big Data, Open Data and Data Development Jean-Louis Monino, Soraya Sedkaoui, 2016-03-03 The world has become digital and technological advances have multiplied circuits with access to data their processing and their diffusion New technologies have now reached a certain maturity Data are available to everyone anywhere on the planet The number of Internet users in 2014 was 2.9 billion or 41% of the world population The need for knowledge is becoming apparent in order to understand this multitude of data We must educate inform and train the masses The development of related technologies such as the advent of the Internet social networks cloud computing digital factories has increased the available volumes of data Currently each individual creates consumes uses digital information more than 3.4 million e-mails are sent worldwide every second or 107 000 billion annually with 14 600 e-mails per year per person but more than 70% are spam Billions of pieces of content are shared on social networks such as Facebook more than 2.46 million every minute We spend more than 4.8 hours a day on the Internet using a computer and 2.1 hours using a mobile Data this new ethereal manna from heaven is produced in real time It comes in a continuous stream from a multitude of sources which are generally heterogeneous This accumulation of data of all types audio video files photos etc generates new activities the aim of which is to analyze this enormous mass of information It is then necessary to adapt and try new approaches new methods new knowledge and new ways of working resulting in new properties and new challenges since SEO logic must be created and implemented At company level this mass of data is difficult to manage Its interpretation is primarily a challenge This impacts those who are there to manipulate the mass and requires a specific infrastructure for creation storage processing analysis and recovery The biggest challenge lies in the valuing of data available in quantity diversity and access speed

Team Coordination in

Extreme Environments Cécile Godé, 2015-12-15 The development and coordination of managerial devices to help businesses cope with the numerous challenges they face have been the subject of many empirical analyses in recent years This book draws from these studies to answer the question of how to coordinate a team in extreme environments Embracing a practice based perspective it identifies work practices and technological uses that improve coordination within teams Organizations need to know how to support the coordination of teams that evolve in highly changing uncertain and risky contexts Beyond reviewing current literature on the analysis of coordination in the field the author draws on military case studies and illustrations to offer readers practical ways to implement devices that facilitate coordination within teams

Social Business and Base of the Pyramid Bénédicte Faivre-Tavignot, 2016-01-19 This book analyzes how social business and base of the pyramid approaches allow companies to reinvent themselves or in other words how they are the levers for strategic renewal It highlights the constraints and possible difficulties encountered in the process of corporate renewal drawing on individual and collective restraints to outline the key themes for a company's successful transition The author uses the case of Danone to explain how such a process of strategic renewal can take time and calls for a shared vision

not only among the directors but between all the players with a strong emphasis on long term commitment Throughout this book the author offers guidance to help others complete this process with success encouraging the reader to seize opportunities for change *Circular Economy, Industrial Ecology and Short Supply Chain* Delphine Gallaud, Blandine Laperche, 2016-06-14 In contrast to the linear take make dispose model of resource consumption a new industrial model is proposed in the form of a circular economy This model aims to optimize the use of resources and to reduce or eliminate waste and is based on re use repair ecodesign industrial ecology sustainable supply and responsible consumption Industrial ecology and short supply chains can contribute particularly on a territorial scale to the emergence of a real sustainable development This book develops these concepts and presents experiments that are taking place in France and other countries in addition to an integrated model which details the mechanisms through which industrial ecology and short supply chains can generate economic social and environmental profits The possible issues and obstacles facing these new practices are also analyzed in order to develop the outline of an adapted management and governance which will enable them to be fully realized Management Systems and Performance Frameworks for Sustainability Lowellyne James, 2018-05-08 All organisations have a responsibility to ensure they have a minimum negative impact on the environment and act as a haven for human development that contributes to positive outcomes for society But small businesses have limited resources with which to pursue sustainability initiatives and must focus on their core objectives in order to survive Through an in depth exploration of quality management theory this book proposes a Sustainability Management Framework as a structure for a balanced approach to developing operations strategy for corporate social responsibility CSR Management Systems and Performance Frameworks for Sustainability explores the frameworks accreditations and awards that small to medium sized enterprises SMEs can utilise to enhance their performance In the first half of the book the author demonstrates how complementary techniques such as the Sustainability Performance Framework can help organisational leaders to develop implement and optimise business strategy into discrete activities of value setting management system and performance model selection and target setting and evaluation to the tactical deployment of sustainability and CSR Meanwhile the second half of the book focuses on real SME case studies to illustrate the use of the Sustainability Strategic Growth Model Sustainability Management Framework and Sustainability Performance Framework to align strategy and policies with compliance obligations United Nations Sustainable Development Goals and Millennium Development Goals This key book is vital reading for undergraduate and postgraduate students of quality management entrepreneurship and sustainability in business executives of SMEs and sustainability policymakers **Corporate Takeover Targets** Hicham Meghouar, 2016-03-31 The term takeover of which the first form is mergers and acquisitions M A refers to the transfer of control of a business from one group of shareholders to another Considering the importance of this issue and the real drives behind takeovers it has become imperative to identifying companies that are vulnerable to takeover by two types tender offer

and exchange offer This book thus presents the legal aspects the theoretical justifications and the empirical contributions of takeovers and analyzes the economic and financial characteristics of targets in order to assess the probability of being acquired An empirical approach based on two quantitative studies is then applied to the European market which is still virgin territory in terms of academic research Finally acquisition probability models have been developed and they have a 72% forecast accuracy average rate of targets Corporate Takeover Targets is aimed at students and researchers in economic and management as well as M A consultants *Fab Labs* Laure Morel,Serge Le Roux,2016-06-16 The digital economy is now expanding rapidly and is starting to overturn the past achievements of the Industrial Revolution Initially engaging in the world of services it is now turning to the manufacture of objects Just as microcomputing evolved from large scale computing to more personal use and as the Internet left behind the world of armies and universities to become universal industrial production is gradually becoming directly controlled by individuals This appropriation is being done either on a personal level or more significantly within local or planetary communities Fab Labs These digital fabrication laboratories offer workshops to members of the public where all sorts of tools are available including 3D printers laser cutters and sanders for the design and creation of personalized objects The bringing together of various users amateurs designers artists dabblers etc and possibilities for collaboration lies at the heart of these open access productive spaces This book covers a range of advances in this new personal fabrication and various issues that it has raised especially in terms of the alternatives to salaried work intellectual property ecological openings and the hitherto unseen structuring of societies Sequencing Apple's DNA Patrick Corsi,Dominique Morin,2016-01-19 This book aims to extract the molecular genes leading to craziness Geniuses are the ones who are crazy enough to think they can change the world and boldly go where no one has gone before Where no past habit and usage are available there is no proof of viability as nobody has done it yet or even imagined it and no roadmap for guidance or market study has come up with it The authors call upon Leonardo Da Vinci the Renaissance genius who as strange as it seems shared many traits of personality with that of Steve Jobs in terms of the ways of performing Da Vinci helps in understanding Jobs and hence Apple with his unique way of designing radically novel concepts which were actually quite crazy for his time In order to shed light on a special creative posture the indomitable sense of specifying undecidable objects a hallmark of the late Steve Jobs is what led the authors to match it with a specific design innovation theory A real theory backed by solid mathematical proof exists and can account for the business virtue of a prolific ability to move into unknown crazy fields The authors postulate that by bringing the power of C K theory to crack open a number of previous observations made about Apple s methods it is possible to identify most of the genes of this company The authors analyze how and why an Apple way of doing business is radically different from standard business practices and why it is so successful Genes are a measure of the entity at hand and can encourage past business education routine approaches then become transferable across the spectrum of the socio economic world *World Scientific Reference On*
