

# OPHTHALMIC PATHOLOGY

- Ophthalmology is the only division in medication that highly relies on medical abilities of the specialist to create an audio analysis.
- This creates ophthalmology as a technology a challenging one to expert because so much relies on the medical ability of the doctor.
- In eye illnesses, an ophthalmologist can basically "see it all" beginning from the eye lid, ocular area, and going through the eye itself, intraocular components up to the retina and optic sensors.
- Pathogenesis is challenging to demonstrate in ophthalmic pathology opinions as pictures signify only an immediate two perspective activities with no temporary concern.
