Taylor, Paul F. Williams, 2020-12-29 The perspective of this book is to present ethics as a conversation about how we decide what is good or bad right or wrong It is a collection of conversations employed by educators to assist accounting students in developing their understanding of accounting's ethical aspects and to help them develop into critical thinkers who consider the ethical complexities of the function of accounting in human society Because we are social beings ethics is a central human concern since it involves determining the ethicality of human actions and their effect on other individuals as well as determining the collective societal acceptance or rejection of an action Thus the book's primary goal is to call attention to the intersectionality of accounting and ethics and to encourage students and researchers to consider the ethical implications of accounting decisions The book contains a diversity of perspectives within which discussions of accountants and accounting's ethical responsibilities may

occur The contributing authors were deliberately chosen for their diverse perspectives on whence moral guidance for accounting may come Each chapter stands on its own and represents the thinking of its authors The book is not a primer on correct behavior for accountants but a place where educators may spur the conversation along Taxation in the Digital Economy Nella Hendriyetty,Chris Evans,Chul Ju Kim,Farhad Taghizadeh-Hesary,2022-07-11 A robust and efficient tax administration in a modern tax system requires effective tax policies and legislation Policy frameworks should cover all aspects of tax administration and include the essential processes of capturing processing analyzing and responding to information provided by taxpayers and others concerning taxpayers affairs By far the greatest challenges facing tax administrations in all countries are those posed by the continuing developments in the digital economy Whereas societies are grappling to come to terms with the transitions from the third industrial or digital revolutions revenue authorities grapple with the consequences for the sustainability of their tax bases and the efficient administration and collection of taxes This book presents a critical review of the status of tax systems in Asia and the Pacific in the era of the digital economy The book suggests how countries can maximize their domestic resource mobilization when confronted by the challenges that digitalization inevitably produces as well as how they can best harness or take advantage of aspects of digitalization to serve their own needs The full implications of the COVID 19 crisis are still too uncertain to predict but it is clear that the crisis will accelerate the trend towards digitalization and also increase pressures on public finances This in turn may shape the preference for and the nature of both multilateral and unilateral responses to the tax challenges posed by digitalization and the need to address them This book will be a timely reference for those researching on taxation in digital economy and for policy makers The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license **Land Tax in Australia** Vince

Mangioni,2015-12-22 Land Tax in Australia demonstrates how land tax operates and is administered across State and local governments in Australia International expert Vincent Mangioni reviews the current status and emerging trends in these taxes in Australia and compares them with the UK USA Canada Denmark and New Zealand Using substantial original research the author sets out what Australia must do through practice and policy to reform and bring this tax into the 21st Century The need for fiscal reform and strengthening the finances of Australia s sub national government is long overdue These reforms aim to minimise the taxpayer revolts encountered in previous attempts at land tax reform while improving tax effort in line with other advanced OECD countries This book provides an essential resource for all property professionals working in development valuation law investment as well as accountants tax economists and government administrators It is highly recommended for students on property taxation legal and social science courses **Insurance in European VAT** Marta Papis-Almansa,2016-11-30 Insurance constitutes a significant part of the financial services sector and is one of the foundations of modern economy and society In the design of tax laws however whether and how to tax insurance is a complex

issue that has become particularly controversial in the area of value added tax VAT In the European Union as in most of the world insurance is exempt from VAT but New Zealand and Australia do not follow this practice Given that New Zealand's simple comprehensive goods and services tax GST called the world's purest value added tax and its modified Australian version do not appear to suffer from the shortcomings in efficiency and effectiveness that plague European VAT a comparison of the two systems is in order This book is not only the first comparative in depth study of the treatment of insurance in the two systems but also the first comprehensive legal research devoted to the treatment of insurance in EU VAT published in English Among the underlying issues and topics treated by the two systems covered are the following who has a right to deduct input VAT in relation to supplies inherent in insurance arrangements and to what extent what constitutes a supply of insurance and consideration for such a supply what transactions fall within the scope of the VAT Directive's exemption for insurance and drawing a line between insurance and saving The analysis is grounded in a methodology in which concepts of European VAT are compared with concepts performing the same function in the Australian and New Zealand GST laws The author concludes with proposals for reform in EU VAT in the light of experience in these two major non EU countries Given that it has been proven that exemptions from VAT such as insurance cause a significant number of economic distortions and inefficiencies this study represents a major contribution to a topical debate in European VAT law It will be welcomed by taxation authorities interested policymakers practitioners and scholars not only in Europe but worldwide
