Part 2 Kris Safarova, 2021-01-21 The goal of this book is to help you

think like a strategy partner and more important develop insights like a strategy partner Almost every management or strategy book is written after the fact They are written years or months after the situation described They are written after the authors have had time to sift through their extensive work and piece together a cohesive story Hindsight is twenty twenty Those types of books are valuable because they eliminate the noise the authors sift out the dead ends they encountered and the wasteful tasks and unproductive administrative nightmares they had to endure to for example obtain a key piece of data You will not see the numerous iterations before the authors arrived at their final framework You will not know the piece of data off hand comment article or client quote that sparked the evolution of the second third fourth and final iteration of the framework You will not see how the hypotheses evolve as vital information and clues are unearthed in conversations with the client from analyses and team discussions You will not observe the choppy nature of how an insight develops You will not see how an early version of an insight is discussed dismissed and sometimes forgotten until a key piece of new data makes it relevant again You will not see the numerous discussions to tweak and adjust hypotheses insights and the final messaging to the client Those books provide valuable lessons and observations Yet the experience is what shapes a leader This book is

different and attempts to give you that experience To see the messy steps involved It was written in real time The notes were written hours before an event happened or hours afterward usually on the same day **The Firm** Duff McDonald,2013-09-10 A revelatory history of the controversial consulting firm traces its decades long influence in both business and political arenas citing its role in the establishment of mainstream practices and modern understandings about capitalism **When McKinsey Comes to Town** Walt Bogdanich,Michael Forsythe,2022-10-04 The Strategy Engagement. **The Consultant's Code** Andy Fry,2017-11-20 The Consultant s Code will help separate you from all of the other consultants by showing you how to properly develop and use the four pillars of success The four pillars are intelligence effort likeability and intent Each pillar is discussed in detail and shows how common misconceptions that have been taught or believed has been holding consultants back These misconceptions and inaccurate beliefs not only affect the consultants they negatively affect clients Understanding that intelligence can be developed as well as knowing the different types of intelligence consultants can use their natural skills to improve their careers Also being aware of the different types of intelligence a consultant can identify deficiencies that may be holding them back develop those capabilities and use it to be more efficient and effective This awareness also

improves relationships as we better understand other capabilities and how those skills are required to have an effective team Effort is required for anyone to be successful however many people are taught to work hard rather than put in focused effort Also consultants are taught to put in billable hours regardless if these hours are focused and efficient Focused effort allows a consultant to be more efficient in their learning consulting hours and other activities Living a full life is based in having focused and concerted effort in what we do each day Likeability may be the most forgotten of all of the pillars by most consultants Consultants are commonly taught to develop technical skills believing that all clients want are technical results However the issues clients face are human based issues The solutions may be technical as well as other forms of solutions but the problems always affect a human being Therefore likeability is critical for the success of a consultant The Consultant s Code discusses methods of developing likeability as well as ways that likeability can be eroded through thoughtless activities that commonly occur on many client engagements The final pillar is Intent Intent is the act of having a purpose to what you are doing and having the tenacity and persistence to battle through the difficult hurdles Due to the nature of temporary engagements consultants can often get away with little to no intent as their client relationships will come to and end This is inaccurate thinking and can lead to lost profits and many strained relationships Using intent will improve a consultants career and their relationships which can result in higher earnings more gratifying rewarding and challenging opportunities The Consultant s Code discusses what consultants can do to develop more intent and have a more fulfilling career
