Moments of Truth Francisco Panizza, George Philip, 2013-11-07 The current financial and sovereign debt crisis of the European Union and the United States can be regarded as the most recent of a wave of financial and sovereign debt crises that have affected different regions of the world over the past quarter century While there is a large and growing body of literature on the economic aspects of financial crises its political elements remain surprisingly under studied Moments of Truth The Politics of Financial Crises in Comparative Perspective fills this gap in the literature by looking at the political repercussions and policy implications of financial crises in comparative perspective using case studies in Latin America Korea and Russia as well as the contemporary crises in the US and in key European countries Contributors to this volume look at the crises as critical junctures that generate high levels of uncertainty while calling for decisive action The chapters emphasize structural or agency based explanations and give relevance to the role of ideas interests and institutions in explaining different outcomes The questions addressed by the case studies include how the crises were defined by key actors the range of political and policy options available to deal with their impact the role of ideas in policy shifts how political and economic actors redefine their interests in contexts of uncertainty how political institutions mediate reactions to the crises what explains the choice of a certain option over other alternatives and whether the crisis has so far resulted in significant political and policy changes or in incremental adjustments to the status quo The first book to comparatively analyze the political dimensions of financial crises across different global regions Moments of Truth will be highly significant for any scholars interested in the contemporary debate on financial crises

After '08 Stephen McBride, Rianne Mahon, Gerard W. Boychuk, 2016-08-04 The 2007-08 financial crisis marked a turning point for social policy World leaders were forced to take a position Should they entrench neo liberal policies in response to the crisis Or should they implement alternative measures to challenge economics as usual After 08 examines how global institutions such as the World Bank International Monetary Fund and International Labour Organization as well as nation states around the world responded to the crisis Comparing the experience of Europe Asia Africa Latin America and North America contributors gauge the extent to which the neo liberal landscape has shifted since the onset of the financial crisis and explore the directions social policy has taken Did the response to the crisis follow a similar trajectory across countries and regions Or did the

diversity in national experiences produce a diversity of policy responses And if so where did alternatives to neo liberalism emerge

Crisis and Politicisation Benedetta Voltolini, Michal Natonski, Colin Hay, 2021-05-18 This book elucidates the link between the politics of a now seemingly permanent crisis in Europe and the politicisation of European integration Looking at the epistemic dimension of crises it suggests that the way in which a crisis is framed and contested determines its potential impact on the level of politicisation of European integration Europe is more challenged and contested today than it has even been facing crisis of an almost existential kind Yet political crises are manufactured and narrated so Europe has the possibility to intervene and bring about her recovery instead of letting these crises prove terminal This book explores the political process in and through which certain events come to be framed as constitutive of a moment that requires a decisive intervention It shows that crises require a double framing a situation needs to be identified as one of crisis in the first place and subsequently the nature and character of the crisis need to be specified By examining a wide range of policy areas the book demonstrates that framing of crises i e identifying one situation both as a crisis and a crisis of a particular kind contributes to the politicisation or depoliticisation of the process of European integration The chapters in this book were originally published as special issue of Journal of European Integration

The Politics of Governance Lucy Koechlin, Till Förster, 2014-11-13 How do government arrangements emerge When and how does individual agency turn into collective agency How do sensory experiences of violence instability etc affect the configuration of governance arrangements When

why and how are governance arrangements institutionalized This book seeks to contribute to a non normative conceptualization of the emergence and transformation of government arrangements and addresses the under theorization of actors and agency in conventional governance theories The editors and contributors theorize the concept of governance more concretely by analyzing the key actors and arrangements that define states of governance across different places and by examining its performance and development in particular settings and time periods Each contribution to the edited volume is based on a case study drawn from Africa though the book argues that the core issues identified remain the same across the world though in different empirical contexts The contributions also range across key disciplines from anthropology to sociology to political science This ground breaking volume addresses governance arrangements discusses how social actors form such arrangements and concludes by synthesizing an actor centered understanding of political articulation to a general theory of governance Scholars across disciplines such as political science development studies African studies and sociology will find the book insightful

What Kind of Democracy? Kateřina Vráblíková, 2016-08-12 The broad expansion of non electoral political participation is considered one of the major changes in the nature of democratic citizenship in the 21st century Most scholars but also governments transnational and subnational political institutions and various foundations have adopted the notion that contemporary democratic societies need a more politically active citizenry Yet contemporary democracies widely differ in the extent to which their citizens get involved in politics beyond voting Why is political activism other than voting flourishing in the United States but is less common in Britain and almost non existent in post communist countries like Bulgaria The book shows that the answer does not lie in citizen s predispositions social capital or institutions of consensual democracy Instead the key to understanding cross country differences in political activism beyond voting rests in democratic structures that combine inclusiveness and contestation

What Kind of Democracy is the first book to provide a theoretically driven empirical analysis of how different types of democratic arrangements affect individual participation in non electoral politics
