

Reading a Calculator Display - Money

Section A Calculator Setup

When using a calculator with money problems, it is best to have your calculator set up to display decimals. There are two ways to achieve this.

- 1) Consider the calculation $\$10 \div 4$.

If this is entered into your calculator you may get an answer as a fraction or as mixed number. This is not very useful.

To convert this to a decimal answer, simply press this button:

- 2) Alternatively, you can change the setup of your calculator to always display the answers as a decimal. To do this, enter the "setup" menu on your calculator (by pressing shift then setup) and selecting option 2 "Line10".

Now try again to calculate $\$10 \div 4$.

Did you get answer of 2.5? In terms of \$ and c., = \$2.50.

Section B Reading the calculator display

Interpret the display on the calculator in \$ and c.

Section C Reading the calculator display

To interpret as \$ and c we must first round the answer to 2 decimal places. $3.333333333333 = \$3.33$
