**Structure and Function of the Arabic Verb** Maher Bahloul, 2007-08-07 Structure and Function of the Arabic Verb is a corpus based study that unveils the morpho syntax and the semantics of the Arabic verb Approaches to verbal grammatical categories the constituents of verbal systems often rely on either semantic pragmatic or syntactic analyses This research bridges the gap between these two distinct approaches through a detailed analysis of Taxis Aspect Tense and Modality in Standard Arabic This is accomplished by showing firstly some basic theoretical concerns shared by both schools of thought and secondly the extent to which semantic structures and invariant meanings mirror syntactic representations Maher Bahloul s findings also indicate that the basic constituents of the verbal system in Arabic namely the Perfect and the Imperfect are systematically differentiated through their invariant semantic features in a markedness relation Finally this study suggests that the syntactic derivation of verbal and nominal clauses are sensitive to whether or not verbal categories are specified for their feature values providing therefore a principled explanation to a long standing debate This reader friendly book will appeal to both specialists and students of Arabic linguistics language and syntax
