Twelve Modern Houses, 1945-1985 Graham Livesey, University of Calgary. Canadian Architectural Archives, Michael McMordie, Geoffrey Simmins, 1995 This publication part of the ongoing mandate of the Canadian Architectural Archives to examine the characteristics of Canadian architecture as reflected in the collections of the University of Calgary Library

examines twelve architect created houses designed between the 1940s and the 1980s for several distinct regions of Canada. The architects chosen number among the most prolific and best known in Canada who were working during this period including Raymond T Affleck, Raymond Moriyama, Arthur Erickson, Douglas Cardinal, John B Parkin Associates and Patkau Architects. Other architects with perhaps a more regional reputation have also been included such as the Vancouver based firm of McCarter Nairne, Calgary's Jack Long and Edmonton's Peter Hemingway. Apart from the documentation of the twelve houses, drawings and photos, there are interpretative essays on each. A co-authored introductory essay explores several related themes: modernity, the contemporary house, approaches to landscape and the role of drawings in contemporary practice.

Designing the British Post-War Home Fiona Fisher, 2015-04-10 In *Designing the British Post War Home* Fiona Fisher explores the development of modern domestic architecture in Britain through a detailed study of the work of the successful Surrey based architectural practice of Kenneth Wood. Wood's firm is representative of a geographically distinct category of post war architectural and design practice: that of the small private practice that flourished in Britain's expanding suburbs after the removal of wartime building restrictions. Such firms, which played an important role in the development of British domestic design, are currently under-represented within architectural histories of the period. The private house represents an important site in which new spatial material and aesthetic parameters for modern living were defined after the Second World War. Within a British context, the architect designed private house remained an important vehicle for the investigation of architectural ideas by second generation modernist architects and designers. Through a series of case study houses designed by Wood's firm, the book reconsiders the progress of modern domestic architecture in Britain and demonstrates the ways in which architectural discourse and practice intersected with the experience, performance and representation of domestic modernity in post war Britain.

Tremaine Houses Volker M. Welter, 2019-11-19 This volume analyzes the extraordinary patronage of modern architecture that the Tremaine family sustained for nearly four decades in the mid twentieth century. From the late 1930s to the early 1970s, two brothers, Burton G Tremaine and Warren D Tremaine, and their respective wives, Emily Hall Tremaine and Katharine Williams Tremaine, commissioned approximately thirty architecture and design projects. Richard Neutra and Oscar Niemeyer designed the best known Tremaine houses. Philip Johnson and Frank Lloyd Wright also created designs and buildings for the family that achieved iconic status in the modern movement. Focusing on the Tremaine's houses and other projects such as a visitor center at the Meteor Crater in Arizona, this volume explores the Tremaine's architectural patronage in terms of the family's motivations and values, exposing patterns in what may appear as an eclectic collection of modern architecture. Architectural historian Volker M Welter argues that the Tremaine's patronage was not driven by any single factor; rather, it stemmed from a network of motives comprising the clients' practical requirements, their private and public lives, and their ideas about
