**Modern Management of Perinatal Psychiatric Disorders** Carol Henshaw, John Cox, Joanne Barton, 2017-03-24 This is a comprehensive overview of mental health problems associated with pregnancy and the year after delivery This is a core component of maternity care The second edition has been updated to reflect current practice recent evidence and new clinical guidelines Topics include diagnosis and management and issues for children and families [Perinatal Mental Health](#) Professor Colin R. Martin, 2012 The prospect of parenthood represents a milestone in anyone's life course and is often a period of stress and challenge There are a number of significant mental health problems that can occur during the perinatal period the consequences of which can be both enduring and occasionally life threatening However irrespective of the specifics of the clinical manifestation of a disturbance the distress and misery that accompanies it has significant ramifications for the mother or mother to be and her partner and family This book is arranged in themed parts that represent key aspects of perinatal mental health

**Perinatal Mental Health** John Cox, Jeni Holden, Carol Henshaw, 2014-02-03 The Edinburgh Postnatal Depression Scale EPDS is a questionnaire and was designed as a simple means of screening for postnatal depression in health care settings The scale is now in use around the world and this book is a practical guide to using the scale in clinical practice its origins and development background This second edition has been revised and contains much advice based on years of experience All chapters and references have been updated and the chapters on screening and counselling have been considerably revised the evidence base on interventions for perinatal depression is provided plus details of innovative methods such as internet based therapy The book includes the EPDS questionnaire itself in 58 other languages plus a discussion of the questionnaire's cultural validity The scale can also be used by researchers seeking information on factors which influence the emotional well being of new mothers and their families and guidance is also given on use of the scale in research settings The book will be useful for psychologists psychiatrists health visitors midwives family doctors obstetricians and community psychiatric nurses plus researchers in perinatal health

**Handbook of Perinatal Clinical Psychology** Rosa Quatraro, Pietro Grussu, 2020-03-26 The book examines the major issues in perinatal clinical psychology with the presence of theoretical information and operational indications through a biopsychosocial approach The

multiplicity of scientific information reported makes this book both a comprehensive overview on the major perinatal mental health disorders and illnesses and a clinical guide. It covers perinatal clinical psychology through a journey of 15 chapters putting the arguments on a solid theoretical basis and reporting multiple operational indications of great utility for daily clinical practice. It has well documented new evidence bases in the field of clinical psychology that have underpinned the conspicuous current global and national developments in perinatal mental health. As such it is an excellent resource for researchers, policy makers and practitioners in fact anyone and everyone who wishes to understand and rediscover in a single opera the current scientific and application scenario related to psychological health during pregnancy and after childbirth.

Parenthood and Mental Health Sam Tyano, Miri Keren, Helen Herrman, John Cox, 2010-04-06. Across all cultures parenting is the foundation of family life. It is the domain where adult mental health meets infant development. Beginning in pregnancy parenting involves many conscious and unconscious processes which have recently been shown to affect a child's development significantly. This book focuses on pregnancy and the first year of life providing a thorough account of the points of encounter between adult and infant psychiatry. In a fresh and comprehensive way it summarises knowledge about early parenting including a critical analysis of parenting: what it means to be a good enough parent and its relationship to infant parent and family outcomes. In addition to the psychiatric dimension the book emphasises the biological aspects of parenting: parental psychopathology and normal and abnormal infant development. Praise for *Parenting and Mental Health* Tyano, Keren, Herrman and Cox have edited a thoughtfully prepared guide on normal and abnormal parenting. They have with enormous skill and wisdom helped to unite the important aspects of pregnancy, infant and childhood development and parenting for adult and child and adolescent psychiatrists. World class internationally recognized clinicians and researchers help make this book useful throughout the world. This is a masterful, culturally sensitive and important book which provides a long overdue and much needed guide on relationships among children, parents and families. Michelle Riba, M.D., M.S., Professor and Associate Chair for Integrated Medical and Psychiatric Services, Department of Psychiatry, University of Michigan, USA. During recent decades progress in the field of infant mental health has been revolutionary; at the same time there has been rapid development in women's mental health. By bringing these two together this pioneering book leads its readers to the vital new focal point around perinatal mental health. The book integrates the origins of developmental psychiatry in attachment and systemic contexts and shows concretely how relationship experiences and biology interact when new life begins. After describing the fascinating world of early parenting the book focuses on problems, difficulties and disorders during this phase of life and above all on how to support, intervene and treat disorders in parenting. When infants, mothers and fathers are understood in a holistic way professionals in many fields will be able to promote the transmission of meaningful life through parenthood and parenting. Tuula Tamminen, Professor of Child Psychiatry, University of Tampere, Finland. Past President of World Association for Infant Mental Health, President of European Society for Child and Adolescent
