Dictionary of Acronyms and Technical Abbreviations J. Vlietstra, Jakob Vlietstra, 1997 My first encounter with acronyms took place when I was ten years old and growing up in an occupied country during the Second World War My father proudly announced one day that despite the ban imposed by the occupying administration he had managed to get a radio installed and could receive the BBC All acronyms used in this introduction are listed in this dictionary To me the meaning of BBC was that we would receive different information about the war than we got from the usual censored broadcasts There was of course the well known acronym associated with the NT but at that time I did not realize that it meant more than the postal service in those years a deteriorated service Gradually the daily use of acronyms grew Most of the newly acquired three and four letter abbreviations referred to organizations such as the broadcasting corporations in The Netherlands and Belgium and references to countries such as the USA USSR and UK When attending high school the HBS after the war my knowledge of acronyms grew slowly Even during the ten years I spent in the Dutch Merchant Marine the GHV the number of acronyms was limited to advanced equipment that eventually became known as RADAR LORAN and DECCA *Farmer field school curriculum for the integrated crop management of paddy, oil seed and pulses crops in central dry zone of Myanmar* Food and Agriculture Organization of the United Nations, 2022-09-09 In this curriculum integrated pest management IPM for these selected crops paddy groundnut sesame green gram and chickpea will be briefly outlined The general concept of IPM will be the same for these crops although the insect pests diseases and weeds may differ from one crop to another The name of pests will be listed for information and important messages those are unique for Myanmar situation will be briefed if necessary rather than giving detailed account of morphology biology ecology and management which can be readily available in published literature It is aimed to improve the knowledge of farmers on the pests including insects plant diseases weeds and rodents causing reduction in the yield of field crops and how to manage the crops to boost the crop production without deteriorating environmental resources for sustainable agriculture **Evolutionary Computation in Combinatorial**
