Molecular Aspects Of Aging Understanding Lung Aging:

Molecular Aspects of Aging Mauricio Rojas, Silke Meiners, Claude Jourdan Le Saux, 2014-03-19 Molecular Aspects of Aging Understanding Lung Aging covers recent research in the mechanisms that contribute to cellular senescence Covering universal themes in aging such as the exhaustion of stem cells and subsequent loss of the regenerative refueling of organs as well as immunosenescence this text illuminates new directions for research not yet explored in the still poorly investigated area of molecular mechanisms of lung aging The molecular nature of general aging processes is explored with targeted coverage on how to analyze lung aging through experimental approaches Conn's Handbook of Models for Human Aging

Jeffrey L. Ram, P. Michael Conn, 2018-04-05 Conn's Handbook of Models for Human Aging Second Edition presents key aspects of biology nutrition factors affecting lifespan methods of age determination use in research and the disadvantages advantages of use Using a multidisciplinary approach this updated edition is designed as the only comprehensive current work that covers the diversity in aging models Chapters on comparative models explore age related diseases including Alzheimer's joint disease cataracts cancer and obesity Also included are new tricks and approaches not available in primary publications This must have handbook is an indispensable resource for researchers interested in the mechanisms of aging gerontologists health professionals allied health practitioners and students Combines both the methods of study for human aging and animal models Provides a historical overview and discussion of model availability key methods and ethical issues Contains over 200 full color illustrations **The Lung** Kent Pinkerton, Richard Harding, Elizabeth Georgian, 2024-11-19

Approx 590 pages Approx 590 pages **Oxidative Stress in Lung Diseases** Sajal Chakraborti, Tapati Chakraborti, Salil Kumar Das, Dhruvajyoti Chattopadhyay, 2019-08-31 This first volume of the comprehensive two volume work on oxidative stress in lung disease introduces the molecular mechanisms and the role of oxidants in the progression of different lung diseases The lungs of humans and animals are under constant threat from oxidants from either endogenous e.g. in situ metabolic reactions or exogenous sources e.g. air pollutants Further oxidative stress causes the oxidation of proteins DNA and lipids which in turn generates secondary metabolic products The book consists of sections each focusing on different aspects of oxidant mediated lung diseases As such it is a unique reference resource for postgraduate students biomedical researchers and also for the clinicians who are interested in studying and understanding oxidant mediated lung diseases The second volume will incorporate other aspects of oxidant mediated lung diseases including prevention and therapeutics

Circadian Rhythms and Their Impact on Aging S. Michal Jazwinski,Victoria P Belancio,Steven M Hill,2017-10-24 Biological rhythms time the ebb and flow of virtually every physiological process and their mutual coordination guarantees the integrity of the organism over space and time Aging leads to the disintegration of this coordination as well as to changes in the amplitude and or frequency of the underlying rhythms The results of this are accelerated loss of health during aging and in experimental model systems curtailed lifespan occurs This book will examine the machinery that constitutes circadian systems and how they impact physiologic processes It will also discuss how disturbances of circadian rhythms can lead to complex diseases associated with aging Much of this treatment will focus on metabolism and genome stability Importantly the chapters in this book will encompass work in several different models in addition to human The book will conclude with a discussion of modeling approaches to biologic cycles and chronotherapy for future research and translation

Physiological Basis of Aging and Geriatrics Paola S. Timiras,2007-08-16 Extensively revised and updated to reflect the current state of knowledge in the study of aging this Fourth Edition offers a complete profile of the aging process at all levels from molecules and cells to demography and evolution Written by international experts in current basic and clinical aging research this text includes aspects of individual comparative and differential aging and discussions of theories and mechanisms of aging This invaluable reference illustrates how bodily systems organs and functions are affected with aging describes how genetic and environmental factors influence age related changes and addresses some of the clinical consequences of these changes for health and longevity Well illustrated with numerous tables and graphs this book presents up to date information from internationally renowned experts in various bio medical fields
