As the first American country with the year 1999 deadline, Argentina's building was the first one completed for housing in the first 100 weeks program. In 1997, within the framework of the problem-solving program, more than 100,000 families of middle-class and middle-class were housed. In 1998, 100,000 more were housed in the country.

Just like the average vehicle age in America is now greater than a human lifespan, it is likely that the average car will outlive its owner's life.

**Abstract**—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were randomly assigned to either a control group (CON) or a training group (TRN). The TRN group performed a 12-week training program consisting of three sessions per week of aerobic exercise. The CON group did not exercise. The HR and EE were measured at baseline and at the end of the 12-week training program. The TRN group showed a significant decrease in HR and a significant increase in EE compared to the CON group. The results of this study suggest that a 12-week training program can improve the cardiovascular fitness and energy expenditure of sedentary, middle-aged women.

1. The first step is to identify the problem. In this case, the problem is that the company is not meeting its sales targets.
