MOSES O. GODWIN, 2025-01-01 In today's Christendom there is a growing misconception about the kingdom's demands in spreading the gospel of our Lord Jesus Christ Many believers mistakenly equate the sacred mission of the gospel with the practices of secular business leading to approaches and objectives that are fundamentally misaligned with God's purpose This book *The Business of the Gospel* brings divine clarity to these errors showing how the methods and goals of the kingdom are entirely distinct from the world's systems Through powerful insights and revelations it exposes the presumptuous sins often committed in ignorance while believers strive to fulfill the Father's commission The Spirit of God illuminates the truth within these pages pointing out the critical differences between the divine calling to build a relationship between the natural and the spiritual and the world's pursuit of profit and self interest This book serves as a guide to correct

Taming the Sharks Christopher L. Peterson, 2004 Taming the Sharks Towards a Cure for the High Cost Credit Market chronicles the historic economic legal and political factors breeding America's feverish high cost debt industry The ideas presented are novel progressive and controversial Historians have long argued that interest rates provide a sort of economic and political health of nations If true the contemporary American market for credit shows troubling signs of distress While Federal Reserve Board monetary policy has kept commercial and prime consumer interest rates low the past two decades have seen explosive growth in an industry specializing in high cost consumer debt Payday loan outlet chains automobile title loan companies rent to own furniture stores pawnshops and sub

prime and manufactured home mortgage lenders are transforming the personal finance patterns of millions of Americans. Many observers have complained this industry charges excessive prices, uses unfair business practices, and is generally causing more harm for its borrowers than good. Industry insiders retort they are merely responding to a legitimate demand for financial services that in effect consumers vote with their feet. Echoing problems of past centuries, today's consumers face difficulty comparing credit prices, patterns of reckless lending and borrowing, as well as distressing economic externalities. With an idea on the future, Peterson's book hopes to find ingredients of a compromise to protect working poor borrowers while simultaneously preserving economic competition.
