Monitoring Children's Rights Monitoring Children's Rights:

Monitoring Children's Rights Eugeen Verhellen, 2023-08-28 Intense political social and scientific efforts to improve the position of children are converging rapidly centered on the UN Convention on the Rights of the Child It is therefore reasonable to assume that there is broad consensus in the international community on how to take the position of children in society seriously Despite the unique success of the Convention the situation is such that it forces us as a matter of urgency to explore develop and implement guarantees for effective monitoring of the implementation of the Convention's provisions In the end rights are only effective when implemented This book containing the contributions made and discussed at the European Conference on Monitoring Children's Rights organized by Ghent University's Children's Rights Centre in December 1994 presents the results of interdisciplinary research into monitoring to a wider scientific forum Several monitoring issues are tackled with particular emphasis on the reporting system what should be reported the content of the reports and who should report the more formal and procedural aspects of reporting Apart from a suitable monitoring mechanism there is also the self-executing force of the Convention making it directly enforceable in national courts Ongoing and dynamic monitoring can be a powerful impetus to making systematic progress in this area The debate on monitoring the Children's Rights Convention may in this way expand into an attractive and exemplary debate on human rights conventions in general This book will therefore not only meet the requirements of all those working in the field of children's rights but can also provide appealing material for all those involved in the field of monitoring human rights **Monitoring State**

Compliance with the UN Convention on the Rights of the Child Ziba Vaghri, Jean Zermatten, Gerison Lansdown, Roberta Ruggiero, 2022-01-03 This open access book presents a discussion on human rights based attributes for each article pertinent to the substantive rights of children as defined in the United Nations Convention on the Rights of the Child UNCRC It provides the reader with a unique and clear overview of the scope and core content of the articles together with an analysis of the latest jurisprudence of the UN Committee on the Rights of the Child For each article of the UNCRC the authors explore the nature and scope of corresponding State obligations and identify the main features that need to be taken into consideration when assessing a State's progressive implementation of the UNCRC This analysis considers which aspects of a given right are most important to track in order to monitor States implementation of any given right and whether there is any resultant change in the lives of children This approach transforms the narrative of legal international standards concerning a given right into a set of characteristics that ensure no aspect of said right is overlooked The book develops a clear and comprehensive understanding of the UNCRC that can be used as an introduction to the rights and principles it contains and to identify directions for future policy and strategy development in compliance with the UNCRC As such it offers an invaluable reference guide for researchers and students in the field of childhood and children's rights studies as well as a wide range of professionals and organisations concerned with the subject Human Rights Monitoring and Implementation

Brian Howe, J.C. Blokhuis, 2018-08-30 More than a quarter of a century has passed since Canada promised to recognize and respect the rights of children under the United Nations Convention on the Rights of the Child Ratification of the Convention cannot however guarantee that everyone will abandon proprietary notions about children or that all children will be free to enjoy the substance of their rights in every social and institutional context in which they find themselves including and perhaps especially within families This disconnect remains one of the most important challenges to the recognition of children's rights in Canada The authors argue that social toxins are as harmful to children's independent welfare and developmental interests as environmental toxins and that both must be eradicated if Canada is to fulfill its commitments under the Convention They also argue that if Canada wishes to ensure the substance of the rights outlined in the Convention are socially guaranteed an attitudinal or cultural shift is required concerning the moral and legal status of children This revised expanded and updated
