Meaning In Suffering Comfort In Crisis Through Logotherapy:

Meaning in Suffering Elisabeth S. Lukas, 1986 *Logotherapy and Existential Analysis* Charles L. McLafferty, Jr., Jay Levinson, 2024-04-13

The second volume in the series presents ground breaking advances of Viktor Frankl's logotherapy and existential analysis with emphasis on the discovery of meaning as central to coping resilience and growth. Noted contributors from around the world present empirical and case study evidence for the importance of meaning in diverse populations and settings as well as theoretical and philosophical perspectives on Frankl's body of thought. The book opens with a historical perspective of the development of logotherapy and personal experiences of those close to Frankl. A section on the amelioration of suffering provides insights into moral injury and finding meaning in blows of fate, unavoidable suffering, death, the injustice of poverty and international conflict. Powerful case studies address Frankl's tragic triad: guilt, suffering, death, facing the end of life, PTSD, childhood sexual abuse, neglect, and suicide prevention. Empirical studies address the search for purpose in life, qualities of meaning among the gifted, and service motivation in college students. Meaning-centered approaches are applied to working with youth and adults in schools and the workplace. Philosophical applications of logotherapy connect Frankl's theory with Buddhist thought and a flaw in the nature vs nurture theory; the dimensional ontology is expanded into four dimensions. Book reviews evaluate topics of interest to logotherapists. Topics include: Case studies using logotherapy in diverse settings; Meaning-centered programs and interventions in the workplace; Innovative approaches to finding meaning with at-risk children and young adults; Applications of logotherapy in military and childhood PTSD; Cross-disciplinary collaboration of logotherapy with rational emotive therapy, cognitive behavior therapy, positive psychology, and Theravada Buddhism; Philosophical applications and extensions of logotherapy; Empirical studies on processes and measures of logotherapy. Volume II of *Logotherapy and Existential Analysis* is intended for caregivers, practitioners, researchers, and students in the fields of logotherapy, mental health, education, workplace management, industrial psychology, and laypeople interested in finding meaning.

Handbook of Posttraumatic Growth Lawrence G. Calhoun, Richard G.

Tedeschi, 2014-07-10 Posttraumatic growth is an area in which investigations are now being undertaken in many different parts of the world. The view that individuals can be changed sometimes in radically good ways by their struggle with trauma is ancient and widespread. However, the systematic focus by scholars and clinicians on the possibilities for growth from the struggle with crisis is relatively recent. There are now a growing number of studies and scholarly papers on the antecedents, correlates, and consequences of posttraumatic growth, and there are also theoretical models that can help guide the research further. It is clear, however, that this phenomenon is not yet well understood. The *Handbook of Posttraumatic Growth: Research and Practice* provides both clinicians and researchers with a comprehensive and up-to-date view of what has been done so far. In addition, it uses the foundations of what has been done to provide suggestions for the next useful steps to take in understanding posttraumatic growth. The book offers contributions of important and influential scholars representing a wide array of perspectives on posttraumatic growth. This volume serves as an impetus for additional work both in the academic aspects and in the possibilities for clinical applications of posttraumatic growth. This Handbook will appeal to students, practitioners, and researchers working in a broad array of disciplines and human services. **Beyond WEIRD:**

Psychobiography in Times of Transcultural and Transdisciplinary Perspectives Claude-Hélène Mayer, Roelf van Niekerk, Paul J.P. Fouché, Joseph G. Ponterotto, 2023-05-27 This volume presents psychobiographical research in non-WEIRD Western, Educated, Industrialized, Rich, and Democratic contexts and samples focusing on culture, transcultural, and transdisciplinary work. It creates a platform for researchers, scholars, and scientists from diverse backgrounds to put forth new theoretical and methodological stances in psychobiography, thereby making the field more inclusive, diverse, and equitable. The chapters in this volume investigate the role of context across the life course of non-WEIRD psychological subjects as well as the interplay between them and their environments across the life span. They further elucidate cognitive, affective, and behavioural aspects of individuals with non-WEIRD backgrounds. The volume provides a broad and at the same time in-depth perspective into psychobiography beyond the usual contexts and therefore has new and original learnings to offer across disciplines and cultures. It is a breakthrough in terms of its transcultural and transdisciplinary insights into lives lived in different contexts in the world. Every person is in certain respects like all other persons, but like some other persons, and like no other persons. This book is a challenging and fascinating exploration of extending psychobiography beyond its origins in Europe and America to women and men of different races and social and economic classes from Africa, Asia, and around the world. At its best, psychobiography can increase people's awareness of their own subjective experience and that of others, contributing to movements for social, cultural, and political change. William McKinley Runyan, Professor Emeritus, Professor of the Graduate School, School of Social Welfare, U of California, Berkeley. *Beyond Weird* is beyond needed. The book triumphantly fills the gap created by a dearth of studies of people other than Western, educated, European, and American men.
