Keagle, 2008-08-17 In the summer of 1989 one of us SLG along with his mentor Dorothy Warb ton attended the Tenth International Workshop on Human Gene Mapping The meeting was held at Yale University in celebration of the first such event which also took place there This meeting was not open to the general public one had to have contributed to mapping a

gene to be permitted to attend The posters of course were therefore all related to gene mapping and many were covered with pretty colorful pictures of a novel fluorescent application of an old technology in situ hybridization Walking through the room Dorothy remarked that because of this new FISH technique chromosomes which had become yesterday's news were once again back in style Approximately three years later a commercial genetics company launched a FISH assay for prenatal ploidy detection A substantial number of cytogeneticists across the country reacted with a combination of outrage and panic Many were concerned that physicians would be quick to adopt this newfangled upstart test and put us all on the unemployment line They did not at the time realize what Dorothy instinctively already knew that FISH would not spell the doom of the cytogenetics laboratory but it would rather take it to new heights
