Mediating Climate Change Mediating Climate Change:

Mediating Climate Change Julie Doyle, 2011 Doyle argues that cultural discourses have problematically situated nature and the environment as objects externalised from humans and culture *Mediating Climate Change* Dr Julie Doyle, 2013-01-28 Climate change has been a significant area of scientific concern since the late 1970s but has only recently entered mainstream culture and politics However as media coverage of climate change increases in the twenty first century the gap between our understanding of climate change and climate action appears to widen In this timely book Julie Doyle explores how practices of mediation and visualisation shape how we think about address and act upon climate change Through historical and contemporary case studies drawn from science media politics and culture *Mediating Climate Change* identifies the representational problems climate change poses for public and political debate It offers ways forward by exploring how climate change can be made more meaningful through for example innovative forms of climate activism the reframing of meat and dairy consumption media engagement with climate events and science and artistic experimentation Doyle argues that cultural discourses have problematically situated nature and the environment as objects externalised from humans and culture *Mediating Climate Change* calls for a more nuanced understanding of human environmental relations in order for us to be able to more fully imagine and address the challenges climate change poses for us all Preparing for Climate Change, 1993-06 Includes policy and scientific overviews atmospheric and oceans processes human health implications of climate change and ozone depletion agricultural ecological and water resource implications implications for coastal planning urban planning the Caribbean Arctic and various other regions energy implications and developing a framework for international climate change North Sea Region Climate Change Assessment Markus Quante, Franciscus Colijn, 2016-08-31 This book offers an up to date review of our current understanding of climate change in the North Sea and adjacent areas as well as its impact on ecosystems and socio economic sectors It provides a detailed assessment of climate change based on published scientific work compiled by independent international experts from climate related disciplines such as oceanography atmospheric sciences marine and terrestrial ecology using a regional evaluation and review process similar to that of the Intergovernmental Panel on Climate Change IPCC It provides a comprehensive overview of all aspects of our changing climate discussing a wide range of topics including past current and future climate change and climate related changes in marine terrestrial and freshwater ecosystems It also explores the impact of climate change on socio economic sectors such as fisheries agriculture coastal zone management coastal protection urban climate recreation tourism offshore activities energy and air pollution **Image Politics of Climate Change** Birgit Schneider, Thomas Nocke, 2014-06-15 Scientific research on climate change has given rise to a variety of images picturing climate change These range from colorful expert graphics model visualizations photographs of extreme weather events like floods droughts or melting ice symbols like polar bears to animated and interactive visualizations Climate change graphics have not only

increased knowledge about the subject they have begun to influence popular awareness of global weather events The status of climate pictures today is particularly crucial as global climate change as a long term process cannot be seen When images are widely distributed they are able to shape how the world is thought about and seen It is this implicit basic assumption of the power of images to influence reality that this book addresses today s images might become the blueprint for tomorrow s realities Image Politics of Climate Change combines a wide interdisciplinary range of perspectives and questions treated here in sixteen interdisciplinary case studies The author s specializations include both visual practice and theory in the fields of climate sciences computer graphics art curating art history and visual studies communication and cultural science environmental and science technology studies The close interlinking of these viewpoints promotes in depth insights into issues of production and analysis of climate visualization A Political Theology of Climate Change Michael S.

Northcott,2013-11-30 Much current commentary on climate change both secular and theological focuses on the duties of individual citizens to reduce their consumption of fossil fuels In A Political Theology of Climate Change however Michael Northcott discusses nations as key agents in the climate crisis Against the anti national trend of contemporary political theology Northcott renarrates the origins of the nations in the divine ordering of history In dialogue with Giambattista Vico Carl Schmitt Alasdair MacIntyre and other writers he argues that nations have legal and moral responsibilities to rule over limited terrains and to guard a just and fair distribution of the fruits of the earth within the ecological limits of those terrains As part of his study Northcott brilliantly reveals how the prevalent nature culture divide in Western culture including its notion of nature as private property has contributed to the global ecological crisis While addressing real difficulties and global controversies surrounding climate change Northcott presents substantial and persuasive fare in his Political Theology of Climate Change **The Impact of Climate Change on European Lakes** Glen George,2009-11-27 In this book scientists from eleven countries summarize the results of an EU project CLIME that explored the effects of observed and projected changes in the climate on the dynamics of lakes in Northern Western and Central Europe Historical measurements from eighteen sites were used to compare the seasonal dynamics of the lakes and to assess their sensitivity to local regional and global scale changes in the weather Simulations using a common set of water quality models perturbed by six climate change scenarios were then used to assess the uncertainties associated with the projected changes in the climate The book includes chapters on the phenology and modelling of lake ice the supply and recycling of nitrogen and phosphorus the flux of dissolved organic carbon and the growth and the seasonal succession of phytoplankton There are also chapters on the coherent responses of lakes to changes in the circulation of the atmosphere the development of a web based Decision Support System and the implications of climate change for the Water Framework Directive **Mechanisms of Global Climate Change at Millennial Time Scales** Lloyd D. Keigwin,1999-01-26 Contributors describe the current understanding of abrupt climate variations that have occurred at millennial to submillennial time scales events now recognized as

characteristics of the global climate during the last glaciation Subjects covered include analysis of modern climate and ocean dynamics paleoclimate reconstructions derived from the marine terrestrial and ice core records and paleoclimate modeling studies The breadth of global paleoclimate knowledge presented here provides information required to answer many questions and provides a road map to address remaining problems Most material is from a June 1998 conference Lacks a subject index Annotation copyrighted by Book News Inc Portland OR

Climate Cultures Jessica Barnes, Michael R. Dove, 2015-01-01 Climate change is one of the most pressing issues of our times yet global solutions have proved elusive This book draws together cutting edge anthropological research to uncover new ways of approaching the critical questions that surround climate change Leading anthropologists engage in three major areas of inquiry how climate change issues have been framed in previous times compared to present day discourse how knowledge about climate change and its impacts is produced and interpreted by different groups and how imagination plays a role in shaping conceptions of climate change

The Routledge Handbook on Cities of the Global South Susan Parnell, Sophie Oldfield, 2014-03-26 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting the imperative for multiple genealogies of knowledge production as well as a diversity of empirical entry points to understand contemporary urban dynamics The Handbook works towards a geographical realignment in urban studies bringing into conversation a wide array of cities across the global south the ordinary mega global and peripheral With interdisciplinary contributions from a range of leading international experts it profiles an emergent and geographically diverse body of work The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in or of the global south arguments that are fluid and increasingly contested geographically and conceptually It reflects on critical urbanism the macro and micro scale forces that shape cities including ideological demographic and technological shifts and constantly changing global and regional economic dynamics Working with southern reference points the chapters present themes in urban politics identity and environment in ways that re frame our thinking about cities The Handbook engages the twenty first century city through a southern urban lens to stimulate scholarly professional and activist engagements with the city

Times of History, Times of Nature Anders Ekström, Staffan Bergwik, 2022-02-11 As climate change becomes an increasingly important part of public discourse the relationship between time in nature and history is changing Nature can no longer be considered a slow and immobile background to human history and the future can no longer be viewed as open and detached from the past Times of History Times of Nature engages with this historical shift in temporal sensibilities through a combination of detailed case studies and synthesizing efforts Focusing on the history of knowledge media theory and environmental humanities this volume explores the rich and nuanced notions of time and temporality that have emerged in response to climate change

Marianna Poberezhskaya, 2015-06-19 The attitude of Russia towards climate change is extremely important for the success of climate change control policies worldwide as Russia with its cold climate and vast resources of carbon fuels is one of the world's biggest polluters Moreover Russia frequently comes across as not being very interested in containing environmental pollution This book explores how issues to do with climate change are handled by the Russian media It discusses how the state and economic elites have influenced Russia's environmental communication with the state's control of the media strengthening since Putin came to power and with control being exercised in some cases by ignoring or silencing the key issues However the book also shows how recently elites and the state in Russia have begun to realise that it is in the state's best interest to pursue more climate oriented policies The book concludes by examining how the communication of climate change issues in Russia could be improved and by assessing the extent to which a recent change in state climate policy could mean that media coverage of climate change in Russia will keep increasing **The Routledge Handbook of Environment**

and Communication Anders Hansen, Robert Cox, 2022-12-26 This revised and fully updated second edition of the Routledge Handbook of Environment and Communication provides a state of the art overview of environmental communication theory practice and research The momentous changes witnessed in the politics of the environment as well as in the nature of media

The Top Books of the Year Mediating Climate Change Mediating Climate Change The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have charmed audiences this year. Mediating Climate Change Mediating Climate Change : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Mediating Climate Change Mediating Climate Change : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Mediating Climate Change Mediating Climate Change : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
