Learning Objective

1. Explain how revealed preferences indicate which goods or activities give a person the most utility
2. Show how the budget constraint affects utility maximization
3. Show how a change in income affects consumption choices
4. Show how a change in price affect consumption choices, and distinguish between the income and substitution effects
5. Outline the ways in which utility is influenced by outside perceptions
6. Describe how people get utility from altruism and reciprocity

The Basic Idea of Utility:

The challenges of gift giving highlight a point that is crucial to economic analysis. \$20 isn't valuable but it is what you can do with it. However, it is harder to figure out what someone else would want that exact \$20.

Utility and Decision Making:

Here let's focus on personal interests. A weekend off. You face the economist question, what are your wants and constraints? The constraints are the time and money in your bank. But, what about your wants? What would you prefer reading a book to feel productive or watching tv to feel relaxed.

You need a universal measure that allows us to compare choices like reading to TV watching and TV watching to working a second job to earn a little extra money. Economists call this measure utility.

Utility: The measure of the amount of satisfaction a person derives from something.

Ex. You can get utility from a snack or scoring a goal in recreational soccer league.

If this service or product was not pleasant, it has essentially reduced your utility.

People make decisions based off their analysis of all their options and which provides the most utility. This is called utility maximization. The base assumption made here is that people are rational utility maximizers.

And even though we assume people are rational utility maximizers they still do unpleasant things all the time. This is their belief that they take into consideration when they account for the trade-off between things that feel good on the short-term vs productivity in the long-term.

An Analysis of John Maynard Keynes's The General Theory of Employment, Interest and Money John Collins, 2017-07-05 John Maynard Keynes's 1936 General Theory of Employment Interest and Money is a perfect example of the global power of critical thinking A radical reconsideration of some of the founding principles and accepted axioms of classical economics at the time it provoked a revolution in economic thought and government economic policies across the world Unsurprisingly Keynes's closely argued refutation of the then accepted grounds of economics employs all the key critical thinking skills analysing and evaluating the old theories and their weaknesses interpreting and clarifying his own fundamental terms and ideas problem solving and using creative thinking to go beyond the old economic theories Perhaps above all however the General Theory is a masterclass in problem solving Good problem solvers identify their problem offer a

methodology for solving it and suggest solutions For Keynes the problem was both real and theoretical unemployment A major issue for governments during the Great Depression unemployment was also a problem for classical economics In classical economics theoretically unemployment would always disappear Keynes offered both an explanation of why this was not the case in practice and a range of solutions that could be implemented through government monetary policy

Principles of Economics Robert H. Frank, Ben Bernanke, 2020-12 lthough many millions of dollars are spent each year on introductory economics instruction in American colleg es and universities the return on this investment has been disturbingly low Studies have shown for example that several months after having taken a principles of economics course former students are no better able to answer simple economics questions than others who never even took the course Most students it seems leave our introductory courses without having learned even the most important basic economic principles
