

1-1 Lesson Reading Guide

Expressions and Formulas

Get Ready for the Lesson

Read the introduction to Lesson 1-1 in your textbook.

- Nurses use the formula $F = \frac{V \times d}{t}$ to control the flow rate for IVs. Name the quantity that each of the variables in this formula represents and the units in which each is measured.

F represents the _____ and is measured in _____ per minute.

V represents the _____ of solution and is measured in _____.

d represents the _____ and is measured in _____ per milliliter.

t represents _____ and is measured in _____.

- Write the expression that a nurse would use to calculate the flow rate of an IV if a doctor orders 1350 milliliters of IV saline to be given over 8 hours, with a drop factor of 20 drops per milliliter. Do not find the value of this expression.

Read the Lesson

- There is a customary order for grouping symbols. Brackets are used outside of parentheses. Braces are used outside of brackets. Identify the innermost expression(s) in each of the following expressions.
 - $[(3 - 2^2) + 8] \div 4$
 - $9 - [5(8 - 6) + 2(10 + 7)]$
 - $(14 - [8 + (3 - 12)^2]) \div (6^2 - 100)$
- Read the following instructions. Then use grouping symbols to show how the instructions can be put in the form of a mathematical expression.
Multiply the difference of 13 and 5 by the sum of 9 and 21. Add the result to 10. Then divide what you get by 2.
- Why is it important for everyone to use the same order of operations for evaluating expressions?

Remember What You learned

- Think of a phrase or sentence to help you remember the order of operations.
