Hospital Capacity Management Robbin Dick, Robert Agness, 2021-03-19 Hospital Capacity Management Insights and Strategies details many of the key processes procedures and administrative realities that make up the healthcare system we all encounter when we visit the ED or the hospital It walks through in detail how these systems work how they came to be this way why they are set up as they are and then in many cases why and how they should be improved right now Many examples pulled from the lifelong experiences of the authors published studies and well documented case studies are provided both to illustrate and support arguments for change First and foremost it is necessary to remember that the mission of our healthcare system is to take care of patients This has been forgotten at times causing many of the issues the authors discuss in the book including hospital capacity management This facet of healthcare management is absolutely central to the success or failure of a hospital both in terms of its delivery of care and its ability to survive as an institution Poor hospital capacity management is a root cause of long wait times overcrowding higher error rates poor communication low satisfaction and a host of other commonly experienced problems It is important enough that when it is done well it can completely transform an entire hospital system Hospital capacity management can be described as optimizing a hospital's bed availability to provide enough capacity for efficient error free patient evaluation treatment and transfer to meet daily demand A hospital that excels at capacity management is easy to spot no lines of people waiting and no patients in hallways or sitting around in chairs These hospitals don't divert incoming ambulances to other hospitals they have excellent patient safety records and efficiently move patients through their organization They exist but are sadly in the minority of American hospitals The vast majority are instead forced to constantly react to their own poor performance This often results in the building of bigger and bigger institutions which instead of managing capacity simply create more space in which to mismanage it These institutions are failing to resolve the true stumbling blocks to excellent patient care many of which you may have experienced firsthand in
