Meadowlark Economics Collected Essays On Ecology Community And Spirituality:

Meadowlark Economics James Eggert, Jim Eggert, 2009 Alarmed by the disappearance of meadowlarks from the fields near his home James Eggert embarked on a close study of the economic and ecological factors behind the loss His inquiry led him to conclude that the meadowlark's survival is a metaphor for ours that our future is intimately linked to the same interplay of economics culture technology and spirituality In this innovative educational book Eggert helps readers understand how our environment is connected to in fact a vital part of our economy and business culture In the title essay Eggert critiques free market capitalism borrowing from Thoreau as he investigates what he calls meadowlark values in education and business The author highlights the preciousness of the Earth itself and persuasively describes the creative possibilities in using science culture evolutionary history and spiritual traditions to gain a deeper understanding of how we might heal the planet A foreword by environmentalist Bill McKibben and an afterword by renowned Buddhist thinker Thich Nhat Hahn add context to this authoritative supplement to current economics texts

Northcott, 2015-06-18 People are born in one place Traditionally humans move around more than other animals but in modernity the global mobility of persons and the

factors of production increasingly disrupts the sense of place that is an intrinsic part of the human experience of being on earth. Industrial development and fossil fuelled mobility negatively impact the sense of place and help to foster a culture of placelessness where buildings, fields and houses increasingly display a monotonous aesthetic. At the same time, ecological habitats and diverse communities of species are degraded. Romantic resistance to the industrial evisceration of place and ecological diversity involved the setting aside of scenic or sublime landscapes as wilderness areas or parks. However, the implication of this project is that human dwelling and ecological sustainability are intrinsically at odds. In this collection of essays, Michael Northcott argues that the sense of the sacred which emanates from local communities of faith sustained a parochial ecology which over the centuries shaped communities that were more socially just and ecologically sustainable than the kinds of exchange relationships and settlement patterns fostered by a global and place-blind economy. Hence, Christian communities in medieval Europe fostered the distributed use and intergenerational care of common resources such as alpine meadows, forests or river catchments. But contemporary political economists neglect the role of bounded places and spatial limits in the welfare of human and ecological communities. Northcott argues that place-based forms of community dwelling and exchange such as a local food economy more closely resemble evolved commons governance arrangements and facilitate the revival of a sense of neighbourhood and of reconnection between persons and the ecological places in which they dwell.

Ecology, Economy and Society Vikram Dayal, Anantha Duraipah, Nandan Nawn, 2018-08-09. This book deals with not just complex linkages, interactions and exchanges that form the relationship between the economic activities, human society and the ecosystems but also the influences and impacts that each causes on the other. In recent times, this ecology-economy-society interface has received unprecedented attention within the broader environment-development discourse. The volume is in honour of Kanchan Chopra, one of the pioneers of research in these areas in India. She has recently been awarded the coveted Kenneth Boulding Award by the International Society for Ecological Economics (ISEE) and is the first Asian to receive it. The four sub-themes of the book reflect some of the important areas in the environment-development discourse: sustainability of development institutions and environmental governance; environment and well-being; and ecosystem and conservation. Within each of the sub-themes, the policy and the practice as well as the macro and micro aspects are addressed. With contributions mainly from ecological economists and ecologists, the book's approach is interdisciplinary both in spirit and content, reflecting the honoree's work which went not just beyond the mainstream ideology of economics but also the way she listened to ideas from disciplines like ecology and sociology. The volume also includes two reflective essays on academic life and works of Kanchan Chopra. The book is a valuable resource for students, teachers, researchers, practitioners and policy makers in the areas of development economics, ecological economics, environmental economics and related disciplines such as conservation, development ecology, economics, environment, governance, health, sociology and public policy.

 Harold Coward,Daniel C. Maguire,2000-01-01 Brings together world religion scholars and creative international economists
 to address the current eco crisis **Liberating People, Planet, and Religion** Joerg Rieger,Terra Rowe,2024-05-29 There
 is growing consensus that life on the planet is in peril if climate change continues at its current pace At stake is not only the
 future of many species but of humanity itself As an increasing number of ecological economists have emphasized these
 problems will only be adequately addressed by re examining economic systems from an ecological perspective fundamentally
 calling into question assumptions of unlimited growth and the maximization of shareholder profit foundational to neoliberal
 capitalism Religion and ecology scholars have also increasingly emphasized the ways climate change challenges assumed
 divides between nature and culture religion and labor economy and ecology and calls for critical and constructive
 engagement with the religion economy and ecology nexus Often though religious engagements with economy and ecology
 have placed emphasis on individual morality action and agency at the level of consumption patterns or have suggested mere
 modifications within existing economic paradigms Contributors to this volume call into question the adequacy of this
 approach in light of the urgency of climate change which is always ever entwined with ongoing patterns of exploitation
 oppression and colonialism in current economic systems Rather than tweaking a system of exploitation for instance by
 emphasizing individual consumption or care for human and non human victims these authors articulate important
 opportunities for religious engagement activism resistance and solidarity around issues of production and labor Recalling
 that Marx linked agencies and labor of people as well as the other than human world these authors aim to articulate a sense
 in which liberation of people and the planet are intertwined and can be accomplished only through collaboration for their
 common good The basic intuition driving this volume is that while Christianity has by and large become the handmaiden of
 exploitative capitalism and empire it might also reclaim latent theologies and religious practices that call into question the
 fundamental valuation of labor without recognition or rest of extractive exploitation and a winner take all praxis In the
 process Christianity might reclaim and reinvest in tenuous historical materializations of transformed ecological and economic
 relationships while economics might be re informed by a valuation of the shared oikos as well as a just accounting of and
 remuneration for labor Together they might serve the aim of the flourishing of all people and the planet **Agrarian Spirit**
 Norman Wirzba,2022-08-01 This refreshing work offers a distinctly agrarian reframing of spiritual practices to address today
 s most pressing social and ecological concerns For thousands of years most human beings drew their daily living from and
 made sense of their lives in reference to the land Growing and finding food along with the multiple practices of home
 maintenance and the cultivations of communities were the abiding concerns that shaped what people understood about and
 expected from life In Agrarian Spirit Norman Wirzba demonstrates how agrarianism is of vital and continuing significance for
 spiritual life today Far from being the exclusive concern of a dwindling number of farmers this book shows how agrarian

practices are an important corrective to the political and economic policies that are doing so much harm to our society and habitats. It is an invitation to the personal transformation that equips all people to live peaceably and beautifully with each other and the land. *Agrarian Spirit* begins with a clear and concise affirmation of creaturely life. Wirzba shows that a human life is inextricably entangled with the lives of fellow animals and plants and that individual flourishing must always include the flourishing of the habitats that nourish and sustain our life together. The book explores how agrarian sensibilities and responsibilities transform the practices of prayer, perception, mystical union, humility, gratitude, and hope. Wirzba provides an elegant and compelling account of spiritual life that is both attuned to ancient scriptural sources and keyed to addressing the pressing social and ecological concerns of today. Scholars and students of theology, ecotheology, and spirituality as well as readers interested in agrarian and environmental studies will gain much from this book.
