Microfranchising Nicolas Sireau, 2017-09-08 It is increasingly clear that fifty years of international development have done little to reduce poverty in Africa. Indeed, more and more academics and practitioners are highlighting the detrimental effect of traditional development as carried out by international agencies and NGOs, which often leads to dependency, inefficiency, waste, and poor governance. Yet there is a new movement that is surging ahead in its attempt to reduce poverty and generate wealth in Africa: microfranchising. Set up by pioneering organizations such as VisionSpring and HealthStore, microfranchising is based on one of the most successful market-based models in Western economies: franchising. From McDonald's to Coca-Cola, franchising has proven itself to be an effective and replicable way of scaling up a business rapidly in the Western context. It is only recently that members of the growing body of social entrepreneurs have turned to the franchise model as one of the responses to Africa's endemic economic stagnation. And the results have been inspiring: instead of the dependency generated by traditional charity development projects, these new social capitalists have generated enterprise and self-sustainability in the most challenging environments of rural Africa. This long-needed book looks at the growth in microfranchising as a tool to generate wealth among poor communities in Africa. The book traces the evolution of the concept of microfranchising from its foundation in Western models to its implementation in African countries today. It provides practical steps from the world's leading experts on how to set up a microfranchise, from recruiting franchisees to building a brand and a supply chain. It gives case studies of successful microfranchises told by the enterprises themselves. It continues with a theoretical analysis of the place of microfranchising within global social entrepreneurship. It ends with a look at the future for microfranchising with recommendations for development. Edited by the former CEO of SolarAid, which created the Sunny Money microfranchise, the book provides a ground-breaking set of case studies and analysis of microfranchising for development. It brings together academics and practitioners to provide context, analysis, and practical advice. Indeed, it provides the theory, the practical advice, and the case studies to guide any entrepreneur, NGO, business, or government interested in setting up their own microfranchise scheme.

Pharmacy on a Bicycle Eric G. Bing, Marc J. Epstein, 2013-05-06 Traditional pathways to delivering health care to the global poor are failing. Five million children die each year before their fifth birthday due to lack of basic health education services or low-cost treatments. Bing and Epstein show how focusing micro-innovations at the level of care is the way to end these grim health statistics.

Base of the Pyramid

3.0 Fernando Casado Canaque, Stuart L. Hart, 2017-09-08 For well over 4 billion people, approximately 60% of all humanity, annual income is less than 1,500. The term Base of the Pyramid was first coined by Stuart L. Hart and C. K. Prahalad in 2002 and has become synonymous with both the method by which we can more effectively address poverty and the opportunity that exists in a multi-trillion-dollar market. A whole new lexicon has emerged to describe this phenomenon, including new buzzwords and catch phrases like inclusive business, opportunities for the majority, sustainable livelihoods, pro-poor business,

and social business and thousands of new businesses institutions and investment funds have been set up In this ground breaking new book Stuart L Hart and Fernando Casado Ca eque have worked with members of the BoP Global Network to shake the tree look objectively at what has happened since 2002 highlight why earlier applications of BoP haven t worked and propose new objectives and ways of working to formulate more sustainable solutions The book challenges the reader and organizations to think about the mindset and purpose across whole organizations open innovation rather than simply co creation and a complete review of the innovation ecosystem Through this book practitioners will gain a clearer insight into which business models can work within different communities to ensure a sustainable transition to improved local economies Equally the book is a must read for researchers and students in the fields of entrepreneurship innovation sustainable development and environmental management
