Microfinance, Debt and Over-Indebtedness Isabelle Guérin, Solène Morvant-Roux, Magdalena Villarreal, 2013-10-15

Although microcredit programmes have long been considered efficient development tools many forms of debt induced distress have emerged in their wake This has brought to light the problem of over indebtedness a topic which has been previously underexplored in the literature This new book from a group of leading scholars explores the manifestations scale and economic and social implications of household over indebtedness in areas conventionally considered as financially excluded The book approaches debt not only as a financial transaction but also as a form of social bond and offers a socioeconomic analysis of over indebtedness The volume puts forward a broad definition of over indebtedness highlighting its situational and semantic complexity and diversity It provides a close analysis of local conceptions of debt and over indebtedness highlighting frameworks of calculation and the constant renegotiation of their boundaries On top of this it looks far beyond microcredit to examine all the financial practices that individuals juggle The volume argues that over indebtedness has more to do with social inequalities than financial illiteracy and should therefore be understood in the light of global trends of financialization It also reveals the ambiguity of financial inclusion policies and in many respects questions the actions of new credit providers This book will be valuable reading for students researchers and policy makers interested in microfinance and development issues

various parts of the world The various case studies focus on the multi functionality of the rural world and the driving forces behind it The book demonstrates that rural areas are no longer simply characterized by an agricultural economy and instead accommodate multiple complementary activities It also touches upon two major changes that have taken place The first is the process of rurbanization which has led to the clear distinction between town and countryside becoming blurred urban traits have penetrated rural areas and rural traits have invaded towns The second change is that rural areas are increasingly seen as multi functional providers not only of food and other natural resources but also locations for the generation of renewable energy wind farms solar farms biogas and regions for the preservation of biodiversity These transformations have resulted in a new understanding and self image of rural areas and their populations

**Clawing Back** Deborah James, 2025-07-01 The impulse to redistribute wealth is said to be a tool to counter inequalities applied by the state or society to curb the worst excesses of capitalist exploitation and free trade In settings where previous political regimes are reformed or toppled and replaced by new ones redistribution can also be a policy specifically oriented at redress one exercised at the formal level of policy Drawing on a comparative ethnography in South Africa and the United Kingdom *Clawing Back* explores how notions of reallocation and payout are intimately connected with those of compensation for a loss Where financialization is accompanied by increased informalization redistribution can equally involve the market as well as kinship and social networks Drawing on a rich ethnography of the human relationships at the center of redistribution Deborah James shows how borrowing can provide negotiation opportunities to wage earners and welfare beneficiaries alike they make use of debt to constitute relations and futures to engage with the state to convert between commodified and non commodified relationships Rather than suggesting that financialization is serving either a totally negative or wholly beneficial purpose James posits a different way of visualizing the relationship between the finance industry and the world of everyday needs
