Mid Year Agriculture Grade11 2013:

Agriculture and the Rural Economy in Pakistan David J. Spielman, Sohail J. Malik, Paul Dorosh, Nuzhat Ahmad, 2017-01-23

Historically agriculture has been crucial to Pakistan's economic growth and development and remains so even today. The sector employs almost half of the country's labor force, supplies key inputs to the country's manufacturing sector, generates a significant share of export earnings and nourishes a rapidly growing population. Further beyond agriculture is the wider rural economy including nonfarm economic activities such as small enterprises, transport services, village retail shops, local schools and clinics, all of which account for an estimated 40 to 57 percent of total rural household income. Given the importance of these rural activities, the slow growth of agriculture in recent years, averaging just 2.8 percent during the period 2010-2014, should be a source of concern for Pakistan. Can the country's agricultural sector and rural economy once again play a significant role in growth and development? Can it contribute to poverty reduction? Agriculture and the Rural Economy in Pakistan: Issues, Outlooks and Policy Priorities seeks to answer these questions by examining the performance of both agriculture and the rural economy. The authors identify several measures that can promote agricultural productivity growth as well as wider economic and social development. These include increasing the efficiency of water use in the Indus river basin irrigation system, especially in the face of climate change; reforming policies and regulations that govern markets for agricultural inputs and commodities; and improving the provision of rural public services for health, education, women's empowerment and community development. The analyses and conclusions in Agriculture and the Rural Economy in Pakistan will be of use to policy makers, development specialists and others concerned with Pakistan's development.

Spore Special Issue - August 2013, 2013-12-31

One of the issues to emerge at CTA's value chains conference Making the Connection held last November was the importance of devoting greater efforts to promoting national and regional markets in ACP countries. Governments, development partners and even the private sector have been overly focussed on selling to developed country export markets which are highly competitive and restrictive. Six of the world's ten fastest growing economies over the last decade are in Africa and as wealth has increased, food import bills have been skyrocketing. If farmers are to benefit from opportunities presented by the growing food demand from urban populations, marketing channels between rural areas and cities must be significantly improved.
