Women, Work, and Patriarchy in the Middle East and North Africa Fariba Solati, 2017-03-20 This book investigates why the rate of female labor force participation in the Middle East and North Africa is the lowest in the world Using a multidisciplinary approach the book explains that the primary reason for the low rate of female labor force participation is the strong institutions of patriarchy in the region Using multiple

proxies for patriarchy this book quantifies the multi dimensional concept of patriarchy in order to measure it across sixty developing countries over thirty years The findings show that Middle Eastern and North African countries have higher levels of patriarchy with regards to women s participation in public spheres compared with the rest of the world Although the rate of formal female labor force participation is low women across the region contribute greatly to the financial wellbeing of their families and communities By defining a woman s place as in the home patriarchy has made women s economic activities invisible to official labor statistics since it has caused many women to work in the informal sector of the economy or work as unpaid workers thus creating an illusion that women in the region are not economically active While religion has often legitimized patriarchy oil income has made it affordable for many countries in the region

The Diffusion of "Small" Western Technologies in the Middle East Uri M. Kupferschmidt, 2023-10-04 In recent years we have become interested in the diffusion of small Western technologies in the countries of the Middle East during the 19th and 20th centuries the era of Imperialism and first globalization We postulated a contrast between small and big technologies Under the latter category we may understand railway systems electricity grids telegraph networks and steam navigation imposed by foreign powers or installed by connected local entrepreneurs But many small Western technologies such as sewing machines typewriters pianos eyeglasses and similar consumer goods which had been developed and manufactured in Europe and America were wanted and willingly acquired by the agency of individual users elsewhere In a few cases however the inventions had to be adapted or were overstepped and even delayed Some were adopted as social markers or status symbols only by elites who could afford them Processes of adoption and diffusion therefore differed according to cultural settings preferences and needs Social and cultural historians and social scientists not only of the Middle East will find in this collection of essays a new approach to the impact of Western technological inventions on the Middle East

Historical Dictionary of the Sudan Robert S. Kramer, Richard A. Lobban Jr., Carolyn Fluehr-Lobban, 2013-03-22 The Republic of the Sudan was long the largest country in Africa and according to the general consensus also one of the least successful in many ways This was not entirely its fault since it lay along the fault line between Muslim and Christian Africa and between the Nile Valley civilizations and African Sudanic cultures This partly explains the long and bloody warfare waged by the Southerners to achieve independence which they did in July 2011 So this hefty book actually covers not one but two states This fourth edition of the Historical Dictionary of the Sudan does so first through a lengthy and detailed chronology tracing its relatively few successes and numerous failures The introductory essay does an admirable job of putting it all in perspective But the most informative part is the dictionary with now over 700 entries for this fourth edition They deal with important personalities politics the economy society culture religion and inevitably the civil war There are also appendixes and an extensive bibliography
