UFOs, the Absurd, and the Limit of Anthropological Knowledge Diana Espírito Santo, 2024-09-20 This book offers an ethnographic and conceptual analysis of contemporary UFO phenomena focusing

specifically on Chilean ufology and the ufological absurd nonsensical instances for their experiencers in which there is no conceptual way out It asks how anthropology can come to terms with what is not said what is not known what is in the dark or even with what both is and is not The work draws on three years of participant observation with empirical ufologists amateur sky watchers and contactees of varying kinds in Chile The chapters mobilize three main bodies of literature to elucidate the ufological absurd negative theology anthropology of play and deceit and the physics of dark matter They explore notions of parallax paradox and trickster anthropology The author takes UFO phenomena specifically the absurd aspects as a heuristic with which to posit a conversation between domains a conversation which highlights darkneses finiteness and the limits of representation and media in anthropology one that could perhaps signal the route to a new language Consideration is given to how not knowing can be a space of extreme productiveness for the discipline The argument put forward is that only by doing an anthropology that looks outside of itself for conceptual inspiration can we come to terms with the non representable the un conceptualizable the fully paradoxical This innovative book will be of particular interest to scholars of anthropological theory and religion

The Alien Abduction Phenomenon

Paul Meehan, 2025-06-13 News reports books articles and films about alien abductions have long captured the public imagination This book traces the evolution of the phenomenon from the late 1940s flying saucer era and the contactee and occupant sightings of the 1950s to the widespread abduction stories of the 1960s and beyond It examines how broader social cultural and scientific contexts have shaped these accounts and offers a critical analysis of their interpretations over time Also discussed are the key researchers who have sought to understand the nature and intentions of alleged extraterrestrial beings or ufonauts while addressing the skepticism about the subject The efforts of the scientific community to investigate unidentified aerial phenomenon UAP and abductions are assessed acknowledging both the challenges and limitations of such inquiries Firsthand encounters with non human entities are examined attempting to uncover the forces behind these sightings and arguing that there could be unforeseen consequences of ignoring the phenomena

Authors of the

Impossible Jeffrey J. Kripal, 2024-05-31 Outstanding and almost certainly controversial Kripal has promise to revitalize and extend the reach of religious studies Choice Most scholars dismiss research into the paranormal as pseudoscience a frivolous pursuit for the paranoid or gullible Even historians of religion whose work naturally attends to events beyond the realm of empirical science have shown scant interest in the subject But the history of psychical phenomena Jeffrey J Kripal contends is an untapped source of insight into the sacred and by tracing that history through the last two centuries of Western thought we can see its potential centrality to the critical study of religion Kripal grounds his study in the work of four major figures in the history of paranormal research psychical researcher Frederic Myers writer and humorist Charles Fort astronomer computer scientist and ufologist Jacques Vallee and philosopher and sociologist Bertrand Russell Through incisive analyses of these thinkers Kripal ushers the reader into a beguiling world somewhere between fact fiction and fraud The cultural

history of telepathy teleportation and UFOs a ghostly love story the occult dimensions of science fiction cold war psychic espionage galactic colonialism and the intimate relationship between consciousness and culture all come together in Authors of the Impossible a dazzling and profound look at how the paranormal bridges the sacred and the scientific An excellent book engaging witty and thoughtful Christopher Partridge Lancaster University Kripal demands nothing short of a paradigm shift in order to make sense of the odd the anomalous and the inexplicable Catherine L Albanese University of California Santa Barbara Quietly earth shattering Victoria Nelson author of The Secret Life of Puppets *The Fortean Influence on Science Fiction* Tanner F. but with a new twist *Civilizations development and species origin technologies* Vadym Valeriyovych Korpachev, 2020-07-07 The origin of life on Earth is the basic view of the world's concept. At present its origin and development are treated either from the scientific evolutionary theory points of view or religious mythological ones. At the same time the evolutionary theory fails to provide grounded explanations to a lot of events which have happened and are observed in nature. The data related to the complexity of life processes genetic programming and many biology and palaeontological facts cast doubt on the possibility of spontaneous occurrence of protein organisms during evolutionary transformations. They indicate that the protein life development occurred in the direction of the planned improvement through the complex technology's implementation which requires specific scientific knowledge. Therefore the necessity to formulate the new technological concept of the life appearance on Earth which is provided by the given book has occurred. It summarizes numerous well known facts which are being interpreted as the result of the highly developed civilization technological developments. The stated views have more grounds for existence than the evolutionary theory and biblical ideas about the divine creation of the world. The fact that society treats all the ideas of the life creation as religious ones and that they are used by the theologians turns out to be the ideological problem. The book is aimed at overcoming the barrier of such non perception. The analysis performed allows the reader to understand in which cases random events occur and in which ones there is a logical purposeful intelligent activity the result of which is the development of self replicating protein organisms programmed to perform the work necessary to meet the needs of their creators on Earth. Reflections on the possible material nature of the highly developed mind carriers are given. According to the author a human being is not a passive observer of random evolutionary changes in nature but has his mission in the artificially developed system of energy supply of Earth along with other protein organisms. If the protein world including humans has been created for a specific purpose then mankind must not violate its implementation and should follow its mission. A new worldview should introduce changes in the main mankind's activity spheres science politics religion and the human being's personal life. The book is designed for a wide range of readers of various specialties. Conceptually it is important for people who do not share the evolutionary theory provisions and existing religious beliefs Borderlands Mike Dash, 2000-11-07 Explore the Borderlands. The charred remains of Helen Conway whose body exploded. Was this a case of spontaneous combustion. Discoveries of 130 foot long boa constrictors and twelve foot giant kangaroos. What other species have gone undiscovered. In England a town is pelted from the sky by hundreds of tiny rose colored frogs. Is this a one time event an omen or a bizarre natural phenomenon. Near death experiences lake monsters crop circles fairies visions of the Virgin Mary. Using his vast research and privileged access to case files noted paranormal investigator Mike Dash has compiled this unprecedented collection of the most baffling puzzles of our time. Touring the globe and sifting through a vast array of eyewitness accounts and film and photographic evidence Dash separates genuine cases from hoaxes and dares to record those macabre inexplicable and terrifying events.

The author's personal experiences provide a penetrating understanding of the phenomenon by demonstrating how and why extramundane weirdness manifests on a personal level, helping people navigate their own synchromystic initiation with a sense of clarity, fostering a constructive relationship with odd occurrences, not a destabilizing one, and enabling readers to successfully pull their own cosmic trigger. **Britain's X-traordinary Files** David Clarke, 2014-09-25. From mediums employed by the police to help with psychic crime busting to sea monster sightings reported to the Royal Navy, Britain's X-traordinary Files brings to light a range of secret documents created by military intelligence and government agencies who have investigated and even used extraordinary phenomena or powers in recent history. Each chapter is underpinned by original official records held at The National Archives which throw new light on many rumours and unsolved historical mysteries including the Angels of Mons and other legends of the Great War plus a variety of strange phenomena reported both in the sea and in the air from phantom helicopters to the great sea serpent of the Victorian era. The final chapter scrutinises official interest in the infamous Loch Ness Monster of Scotland and the Beast of Bodmin.
