*Essential Operational Components for High-Performing Healthcare Enterprises* Jonathan Burroughs,2018-08-21 The future of healthcare is clear The move toward value based care is happening at an unprecedented rate and requires healthcare enterprises to build delivery models that focus on clinical and business outcomes not on volume This shift requires a new infrastructure that supports the digitization standardization commoditization and globalization of the healthcare industry In *Essential Operational Components for High Performing Healthcare Enterprises* Jon Burroughs and other nationally respected experts highlight the operational building blocks necessary to engage align and transform healthcare organizations into integrated delivery systems capable of delivering population healthcare outcomes in new ways They must marshal cutting edge tools including cloud based data storage disruptive innovation technologies and strategic partnerships that span the globe This forward thinking book defines the fundamental operational components for achieving success in a value based world including Collaborative leadership skills Governance competencies Rapidly evolving clinical and executive roles Dynamic strategic planning and contracting Models of clinical integration and alignment that are capable of managing actuarial risk Seamless transmission of cloud based health information through global health information exchanges Predictive business and clinical analytics to manage actuarial risk and population healthcare outcomes A population health infrastructure to support the cost effective redistribution of resources Other industries have undergone a similar transformation now healthcare the most complex industry of all must complete these changes to excel in the new global

marketplace This book shows the way Challenges and Opportunities in Healthcare Leadership Angela Lampe, Cindy Costanzo, William Leggio, Timothy C. Guetterman, 2023-01-01 Leaders in healthcare today face many challenges ranging from managing interprofessional teams and teamwork to payment reform to tackling issues such as homelessness and the opioid crisis Leaders have access to depth of information and resources to help them solve these complex and real world problems However it is our belief that given the complexities of healthcare there is value in sharing and learning from those who have first hand experience with interprofessional leadership in healthcare *Challenges and Opportunities in Healthcare Leadership* Voices from the Crowd in Today's Complex and Interprofessional Healthcare Environment is a volume in a book series titled Contemporary Perspectives in Business Leadership In this book authors share their true authentic reflections and professional stories describing the lived experiences of the author leaders and how the experience changed the author leaders approach as an interprofessional leader Each chapter includes a 1 story about the topic and the lived experience 2 perspectives and 3 lessons of the author's Additionally scholarly commentary and discussion questions included within each chapter create opportunity for application to leadership theories and strategies as well as allow for reflection and further dialogue on the topic The intended audience is broad including faculty and students in institutions of higher education interprofessional healthcare team leaders and members and other healthcare stakeholders who have experience in interprofessional healthcare leadership The book is applicable for leadership growth and development at a personal group or organizational level *Person-centred Health Care* Stephen Buetow, 2016-06-10 Person centred health care is increasingly endorsed as a key element of high quality care yet in practice it often means patient centred health care This book scrutinizes the principle of primacy of patient welfare which although deeply embedded in health professionalism is long overdue for critical analysis and debate It appears incontestable because patients have greater immediate health needs than clinicians and the patient clinician encounter is often recognized as a moral enterprise as well as a service contract However Buetow argues that the implication that clinician welfare is secondary can harm clinicians patients and health system performance Revaluing participants in health care as moral equals this book advocates an ethic of virtue to respect the clinician as a whole person whose self care and care from patients can benefit both parties because their moral interests intertwine and warrant equal consideration It then considers how to move from values including moral equality in health care to practice for people in their particular situations Developing a genuinely inclusive concept of person centred care accepting clinicians as moral equals it also facilitates the coalescence of patient centred care and evidence based health care This reflective and provocative work develops a constructive alternative to the taken for granted principle of primacy of patient welfare It is of interest to students and academics in the health and caring sciences philosophy ethics medical humanities and health management **Implementation of Personalized Precision Medicine** William P. Stanford, Laura Kelly, 2024-11-22 Implementation of Personalized Precision Medicine Expanding the Clinical Vision towards Prevention Early Detection and

Kopacz, 2014-11-28 What starts as personal dissatisfaction in the workplace can become personal transformation that changes clinical practice and ultimately changes the culture of medicine Physicians and professionals train extensively to relieve suffering Yet the systems they train and practice in create suffering for both themselves and their clients through the neglect of basic human needs True healthcare reform requires addressing dehumanization in medicine by caring for the whole person of the professional and the patient Re humanizing Medicine provides a holistic framework to support human connection and the expression of full human being of doctors professionals and patients A clinician needs to be a whole person to treat a whole person thus the work of transformation begins with clinicians As professionals work to transform themselves this will in turn transform their
