that still impact the modern world *The Easter Computus and the Origins of the Christian Era* Alden A.

Mosshammer, 2008-10-16 The system of numbering the years AD Anni Domini Years of the Lord originated with Dionysius Exiguus Dionysius drafted a 95 year table of dates for Easter beginning with the year 532 AD Why Dionysius chose the year that he did to number as 1 has been a source of controversy and speculation for almost 1500 years According to the Gospel of Luke 3 1 3 23 Jesus was baptized in the 15th year of the emperor Tiberius and was about 30 years old at the time The 15th year of Tiberius was AD 29 If Jesus was 30 years old in AD 29 then he was born in the year that we call 2 BC Most ancient authorities dated the Nativity accordingly Alden Mosshammer provides the first comprehensive study of early Christian methods for calculating the date of Easter to have appeared in English in more than one hundred years He offers an entirely new history of those methods both Latin and Greek from the earliest such calculations in the late second century until the emergence of the Byzantine era in the seventh century From this history Mosshammer draws the fresh hypothesis that Dionysius did not calculate or otherwise invent a new date for the birth of Jesus instead adopting a date that was already well established in the Greek church Mosshammer offers compelling new conclusions on the origins of the Christian era drawing upon evidence found in the fragments of Julius Africanus of Panodorus of Alexandria and in the traditions of the Armenian church **Generations of Praise** Bruce E. Where Did We Get A Bible? Darren Roberts, 2012-11-29 An introduction to the history of the scriptures that became known to different religions as their Bibles Judaism and Christianity share the same original scriptures but Christians and Muslims each made separate texts into their religion s sacred scriptures while other religions never built upon the Hebrew Scriptures in the first place Learn the history of not only when and how we got a Bible but why so many different religious groups each consider theirs the only one **Christians or Jews?** Réka Tímea

Újlaki-Nagy, 2022-09-05 Transylvanian Sabbatarianism emerged from the aspirations of the Reformation without direct contact with the Jews Although the most frequently asked question about them concerns their identity were they Christians or Jews the answers of the literature are superficial biased and take only an external point of view The aim of this book therefore is to move closer to the 16 17th century Sabbatarian manuscripts and to examine how much they were still connected to Christianity in their biblical interpretations doctrines and religious practices how they adapted to Judaism and how they saw themselves in relation to the two world religions The analysis of Réka Tímea Újlaki Nagy shows that although they still held some Christian beliefs these were considered to be incidental and unnecessary to salvation Sabbatarians followed the ideal of an age preceding Christ consequently the Reformation effort to reconstitute apostolic Christianity disappeared from their religious thought **There's an Easter Egg on Your Seder Plate** Steven Carr Reuben, 2007-11-30

Robinson, 2019-06-14 Christianity is one of the world's great religions with more than two thousand years of history and over two billion adherents worldwide But what is Christianity Where did it come from How did it develop to its current forms What doctrines do Christians affirm What ethical norms do they endorse What relationships between church and state do they champion and why What changes have transpired for the faith over the centuries And what new challenges does Christianity face in the contemporary world These and other questions are addressed in Michael Robinson's *Christianity: A Brief History* After a concise description of the social political and religious world of first century Palestine the text quickly examines the Jesus of history and tradition including Jesus' impact upon his first century followers the narrative then moves to describe the expansions and developments of Christianity through the ancient medieval modern and contemporary eras Along the way readers learn of the varied beliefs mores rituals struggles and triumphs of the faith as well as of the spiritual heights and moral blunders of its people Robinson's intention is to introduce Christianity through its story and through those who lived it

The Oxford Companion to Food Alan Davidson, 2006-09-21 *The Oxford Companion to Food* by Alan Davidson first published in 1999 became almost overnight an immense success winning prizes and accolades around the world Its combination of serious food history culinary expertise and entertaining serendipity with each page offering an infinity of perspectives was recognized as unique The study of food and food history is a new discipline but one that has developed exponentially in the last twenty years There are now university departments international societies learned journals and a wide ranging literature exploring the meaning of food in the daily lives of people around the world and seeking to introduce food and the process of nourishment into our understanding of almost every compartment of human life whether politics high culture street life agriculture or life and death issues such as conflict and war The great quality of this Companion is the way it includes both an exhaustive catalogue of the foods that nourish humankind whether they be fruit from tropical forests mosses scraped from adamantine granite in Siberian wastes or body parts such as eyeballs and testicles and a richly allusive commentary on the culture of food whether expressed in literature and cookery books or as dishes peculiar to a country or community The new edition has not sought to dim the brilliance of Davidson's prose Rather it has updated to keep ahead of a fast moving area and has taken the opportunity to alert readers to new avenues in food studies

Calendars in Antiquity Sacha Stern, 2012-09-06 Calendars were at the heart of ancient culture and society and were far more than just technical time keeping devices *Calendars in Antiquity* offers a comprehensive study of the calendars of ancient Mesopotamia Egypt Persia Greece Rome Gaul and all

other parts of the Mediterranean and the Near East from the origins up to and including Jewish and Christian calendars in late Antiquity In this volume Stern sheds light on the political context in which ancient calendars were designed and managed Set and controlled by political rulers calendars served as expressions of political power as mechanisms of social control and sometimes as assertions of political independence or even of sub culture and dissidence While ancient calendars varied widely they all shared a common history evolving on the whole from flexible lunar calendars to fixed solar schemes The Egyptian calendar played an important role in this process leading most notably to the institution of the Julian calendar in Rome the forerunner of our modern Gregorian calendar Stern argues that this common evolutionary trajectory was not the result of scientific or technical progress It was rather the result of major political and social changes that transformed the ancient world with the formation of the great Near Eastern empires and then the Hellenistic and Roman Empires from the first millennium BC to late Antiquity The institution of standard fixed calendars served the administrative needs of these great empires but also contributed to their cultural cohesion
