Industry and Individuals: Branding, Labelling, and Marketing of Food Products Daniel Adrian Gardan,Paweł Bryła,Ionel Dumitru,Iuliana Petronela Gardan,2025-02-10 There is a growing interest in understanding the multifaceted factors that influence individuals food and dietary behaviors and purchasing choices These include psychological cultural economic and social factors However there is a need to delve deeper into the role of food and beverage companies industries and multinational corporations in shaping individuals dietary decisions and purchasing behaviors Despite ever increasing reliance on industry for providing fast convenient and affordable food limited research exists that holistically synthesizes the influence

of strategies employed by food companies on the intricate landscape of food consumption and purchasing. More and more food companies and industries battle for consumer attention in a world pushing for healthfulness and environmental and ethical sustainability. With individuals facing an increasingly diverse range of food options and marketing strategies, understanding the factors that guide their choices is critical for both businesses and policymakers. It is therefore crucial for us to understand the understanding usage and consumer perception of food labels including front of pack nutrition information and health claims and other aspects of food packaging design e.g. material colour usage branding. For example, there is an increased need to understand factors that may influence consumer perception around certain brand identities in the context of boycotting and fear of green washing.
