Fabrizi, 2016-10-11 Fantasy literature often derided as superficial and escapist is one

of the most popular and enduring genres of fiction worldwide It is also perhaps surprisingly thought provoking structurally complex and relevant to contemporary society as the essays in this volume attest The scholars teachers and authors represented here offer their perspectives on this engaging genre Within these pages a reader will find a wealth of ideas to help teachers use these texts in the classroom challenging students to read fantasy with a critical eye They employ interdisciplinary philosophical and religious lenses as well as Marxist and feminist critical theory to help students unlock texts The books discussed include epic fantasy by such authors as Tolkien and Le Guin children's fantasy by Beatrix Potter and Saint-Exupéry modern fantasy by Rowling and Martin and even fairy tales and comic books The contributors offer provocations questioning the texts and pushing the boundaries of meaning within the fantasy genre And in doing so they challenge readers themselves to ponder these tales more deeply But through each of these chapters runs a profound love of the genre and a respect for those who produce such beautiful and moving stories Furthermore as with all the books in this series this volume is informed by the tenets of critical pedagogy and is focused on re-envisioning fantasy literature through the lens of social justice and empowerment Prepare to be challenged and inspired as you read these explorations of a much loved genre **The Routledge Companion to Gender and Science Fiction** Lisa Yaszek, Sonja Fritzsche, Keren

Collins, Gavin Jones, 2023-05-25 This Companion offers students and scholars a comprehensive introduction to the development and the diversity of the American short story as a literary form from its origins in the eighteenth century to the present day Rather than define what the short story is as a genre or defend its importance in comparison with the novel this Companion seeks to understand what the short story does how it moves through national space how it is always related to other genres and media and how its inherent mobility responds to the literary marketplace and resonates with key critical themes in contemporary literary studies The chapters offer authoritative introductions and reinterpretations of a literary form that has re emerged as a major force in the twenty first century public sphere dominated by the Internet **Old Futures** Alexis Lothian, 2018-09-25 Finalist 2019 Locus Award for Nonfiction presented by the Locus Science Fiction Foundation Traverses the history of imagined futures from the 1890s to the 2010s interweaving speculative visions of gender race and sexuality from literature film and digital media Old Futures explores the social political and cultural forces feminists queer people and people of color invoke when they dream up alternative futures as a way to imagine transforming the present Lothian shows how queer possibilities emerge when we practice the art of speculation of imagining things otherwise than they are and creating stories from that impulse Queer theory offers creative ways to think about time breaking with straight and narrow paths toward the future laid out for the reproductive family the law abiding citizen and the believer in markets Yet so far it has rarely considered the possibility that instead of a queer present reshaping the ways we relate to past and future the futures imagined in the past can lead us to queer the present Narratives of possible futures provide frameworks through which we understand our present but the discourse of the future has never been a singular one Imagined futures have often been central to the creation and maintenance of imperial domination and technological modernity Old Futures offers a counterhistory of works that have sought with varying degrees of success to speculate otherwise Examining speculative texts from the 1890s to the 2010s from Samuel R Delany to Sense8 Lothian considers the ways in which early feminist utopias and dystopias Afrofuturist fiction and queer science fiction media have insisted that the future can and must deviate from dominant narratives of global annihilation or highly restrictive hopes

for redemption Each chapter chronicles some of the means by which the production and destruction of futures both real and imagined takes place through eugenics utopia empire fascism dystopia race capitalism femininity masculinity and many kinds of queerness reproduction and sex Gathering stories of and by populations who have been marked as futureless or left out by dominant imaginaries Lothian offers new insights into what we can learn from efforts to imaginatively redistribute the future

Speculative Epistemologies John Rieder, 2021-09-15 Speculative Epistemologies is about truth effects in sf which stands for both science fiction and speculative fiction It examines six narratives one from each decade from the 1960s to the 2010s that challenge dominant assumptions about the normal the possible and the real It asks what the patterns of overlap and interference generated by texts located in border territories that make their identification as sf problematic and sometimes controversial can reveal about the dynamics of sf's multiple subcultures e.g. professionals academics and fans the complexity of the genre's communities of practice and their routes of production distribution and reception and the genre's shifting position within a broadly conceived field of literary and cultural production The speculative epistemologies in these stories are counter hegemonic ways of knowing ways of imagining knowing differently and the focus of this study is their effect on the formation of identities and communities Combining the methods of genre theory reception theory and the sociology of cultural production the readings of these six narratives trace a history of sf's increasingly feminist racially and ethnically diverse philosophically ambitious and politically engaged character from the 1960s to the present

Project(ing) Human: Representations of Disability in Science Fiction Courtney Stanton, 2023-05-30 This edited volume examines representations of disability within popular science fiction using examples from television film literature and gaming to explore how the genre of science fiction shapes cultural understanding of disability experience Science fiction texts typically grapple with concepts such as transhumanism embodiment and autonomy more directly than do those of other genres In doing so they raise significant questions about the experience of disability More broadly they often convey the place of disability in not only the future but also the world of today Through critical research the chapters within this interdisciplinary collection explore what science fiction texts convey
