## **Offworld Dangerous Times Collection 1:**

**Offworld (Dangerous Times Collection Book #1)** Robin Parrish, 2009-07-01 The return of NASA's first manned mission to Mars was supposed to be a momentous day. But when the crew loses touch with ground control before entry, things look bleak. Safe after a treacherous landing, the crew emerges to discover the unthinkable: every man, woman, child, and animal has vanished without a trace. Alone now on their home planet, the crew sets out to discover where everyone has gone and how to get them back, only to discover they may not be as alone as they thought.

**Nightmare (Dangerous Times Collection Book #2)** Robin Parrish, 2010-07-01 Ghost Town is the hottest amusement park in the country, offering state-of-the-art chills and thrills involving the paranormal. The park's main ride is a haunted mansion that promises an encounter with a real ghost. When Maia Peters visits during her senior year of college, she's not expecting to be impressed. Maia grew up as the only child of a pair of world-renowned ghost hunters, so the paranormal is nothing new. In fact, the ride feels pretty boring until the very end. There, a face appears from the mist: the face of Jordin Cole, a girl who disappeared from campus a year ago. Convinced what she saw wasn't a hoax and desperate to find answers to Jordin's disappearance, Maia launches into a quest for answers. Joined by Jordin's boyfriend, a pastor's kid with very different ideas about the spirit realm, Maia finds herself in a struggle against forces she never expected to confront.

**Words on Cassette, 2002** R. R. Bowker Publishing, 2002 **How Silicon Valley Unleashed Techno-feudalism** Cédric Durand, 2024-09-03 The rise of the IT industry in the nineties promised a new era of freedom and prosperity. It didn't deliver. Certainly, algorithms are everywhere, but capitalism is no more civilised than ever. In fact, in the hands of private corporations, the digitalisation of the world drives us towards a darker future. The return of monopolies, the dominance of a few platforms, the blurred distinction between the economic and the political all epitomise a systemic mutation. Information and data networks push the digital economy in the direction of the feudal logic of rent, dispossession, and personal domination. **How Silicon Valley Unleashed Techno-feudalism** offers a fresh genealogy of the Silicon Valley consensus and its contradictions. It disentangles the principles of an emerging systemwide rationale. Large firms compete in cyberspace to gain control over data, and ordinary people are increasingly at the mercy of tech giants. In this new economic order, capital is moving away from production to focus on predation.

**Survivors: The second book of The Off World Trilogy** Patrick Locke, 2014-12-24 In the second book of *The Off World Trilogy*, Jacob Young awakens to find himself alone and forsaken amidst the ruins of the destroyed planet TUE. Forced by the Khonians to fight in their ancient war against the Rha-ket-gar, Jacob and his fellow Saje endured the terrible battles and torture of their conscription, only to be betrayed and left to die as the massive planet-killer bombs rained down on them, sucking the oxygen from the planet's surface. Now further from home than ever, Jacob must face his fears, search for his missing comrades, and lead the Saje survivors on their quest to find their own way back to Earth. Along the way, they battle new enemies on land and in space while striving to retain the core of their humanity and, above all, hope.

**The Alliance Series Books 1-3** Emma L. Adams, On an alternative

21st century Earth in which our world is one of many in the Multiverse the Inter World Alliance exists to keep the peace between the worlds and keep the monsters out Ever since a devastating magical war tore apart Ada Fletcher s homeworld she and her family have lived under cover on the low magic Earth Stuck in a dead end job in London Ada has spent her life hiding her true identity and her magic Accused of a crime she didn t commit and taken into Alliance custody the last thing she wants is to help Kay Walker son of the absentee council member responsible for exiling her homeworld from the Multiverse But when circumstances push them into an unlikely truce there s no going back Ada and Kay face rampaging wyverns power hungry magic wielders and enraged centaurs hell bent on declaring war on their human neighbours The wonders of the Multiverse await them if they can survive the storm that s coming This boxed set includes the first three novels in the world hopping Alliance series Adamant Nemesis and Collision This blend of contemporary fantasy murder mystery and an action packed world hopping adventure will appeal to fans of the alternate Londons of Ben Aaronovitch and V.E. **Where Is My Flying Car?** J. Storrs Hall, 2021-11-30 From an engineer and futurist an impassioned account of technological stagnation since the 1970s and an imaginative blueprint for a richer more abundant future The science fiction of the 1960s promised us a future remade by technological innovation We d vacation in geodesic domes on Mars have meaningful conversations with computers and drop our children off at school in flying cars Fast forward 60 years and we re still stuck in traffic in gas guzzling sedans and boarding the same types of planes we flew in over half a century ago What happened to the future we were promised In Where Is My Flying Car J Storrs Hall sets out to answer this deceptively simple question What starts as an examination of the technical limitations of building flying cars evolves into an investigation of the scientific technological and social roots of the economic stagnation that started in the 1970s From the failure to adopt nuclear energy and the suppression of cold fusion technology to the rise of a counterculture hostile to progress Hall recounts how our collective ambitions for the future were derailed with devastating consequences for global wealth creation and distribution He then outlines a framework for a future powered by exponential progress one in which we build as much in the world of atoms as we do in the world of bits one rich in abundance and wonder Drawing on years of original research and personal engineering experience Where Is My Flying Car originally published in 2018 is an urgent timely analysis of technological progress over the last 50 years and a bold vision for a better future

**Time-Travel Television** Sherry Ginn, Gillian I. Leitch, 2015-10-08 Stories of time travel have been part of science fiction since H G Wells sent his nameless hero hurtling into Earth s distant future in The Time Machine Time travel enables the storyteller to depict alternate realities bring fictional characters face to face with historical figures and depict moral and ethical dilemmas in which millions of lives or the world as we know it are at stake From Doctor Who and Quantum Leap to the multiple incarnations of Star Trek time travel has been a staple of science fiction television for more than fifty years Time Travel Television The Past from the Present the Future from the Past surveys the whole range of time travel stories on the small screen The essays in this collection explore time travel series both familiar Babylon 5 Stargate SG 1 and forgotten The Time Tunnel Voyagers as well as time travel themed episodes and arcs in series where it is not central such as Red Dwarf Lost and Heroes Contributors to this volume consider some of the classic themes of time travel stories the promise and peril

of fixing the past the chance to experience and choose possible futures and the potential for small changes to have great effects Exploring time travel as a teaching tool as a vehicle for moral lessons and as a background for high adventure this book offers new perspectives on many familiar programs and the first serious study of several unjustly neglected ones Time Travel Television is essential reading for science fiction scholars and fans and for anyone interested in the many ways that television brings the fantastic into viewers living rooms

**Reclaiming Space** James S. J. Schwartz, Linda Billings, Erika Nesvold, 2023 Reclaiming Space is an innovative study of space travel's history legitimacy and future The NewSpace movement that presently dominates spaceflight culture is characterized by distinctly Western free market capitalist values and associated with the space ambitions of the super wealthy This book exists to incubate illuminate and illustrate a more diverse and inclusive conversation about space exploration Reclaiming Space asks What would space exploration be like if we prioritized or even simply acknowledged the perspectives and value systems of individuals who are disabled aren't white aren't male or aren't characteristically Western in their values What can these perspectives teach us all about space exploration and its value or even its potential for harm that cannot be easily recognized or appreciated under the NewSpace status quo And what should we be doing differently when it comes to space exploration The twenty seven original essays in this volume provide much needed perspective on space exploration by offering counterpoints to mainstream thinking about space Essays address subjects such as the history and development of spaceflight culture both within and outside the United States the impact of science fiction and space art on how we conceptualize space diverse cultural narratives and responses to space and the ways space exploration might be leveraged in support of repairing injustices Reclaiming Space also considers what our responsibilities might be as a spacefaring species in the distant future Contributors include academics who research space exploration spaceflight culture space ethics and space policy as well as space artists and authors of award winning science and speculative fiction Written for space enthusiasts of all backgrounds Reclaiming Space is an engaging provocative volume of essays showcasing the perspectives of women persons of color and others who are typically left out of discussions of space exploration

***Property Rights in Outer Space*** Matthew Johnson, 2024-05-28 This book explores the role of private mining rights in the utopian imaginary of space colonisation. It presents a transdisciplinary account of the new and evolving legislative frameworks that have been established in anticipation of commercial exploitation of the mineral resources of the off world frontier. Written in an engaging style, the book investigates a novel case study in the history of capitalism and the commons: the emergence of a nascent space mining industry undergirded by a contentious legislative framework. In 2015 the US passed laws that would recognise the claims of US corporations to own and sell space resources. This unilateral act of pre-emptive law making would appear to contravene the terms of the UN Outer Space Treaty 1967 which declared that the exploration and use of outer space should be for the benefit of all mankind and not subject to national appropriation. Using this central dynamic between privately held mining rights and outer space as a global commons, Matthew Johnson constructs an historical sociology of space mining from the deep historical roots of common and private property to the contemporary networks of neoliberalism that have engaged with the commercialisation of space activity. The anticipatory expansion of private property claims beyond the Earth both resonates with and problematises the terrain of political history such as the tensions between states and markets, public law and private power, the commons and exclusive property. The emerging cosmopolitics of off world private property mirrors and is often explicitly embedded within neoliberal geopolitics, prompting urgent questions about how we can reaffirm principles of democracy and common heritage in the international laws of Earth and space. This book is compelling reading for anyone interested in the social study of space law, economics, technology, politics and property rights.

***The New Gold Rush*** Joseph N. Pelton, 2016-11-04 This book captures the most exciting advances in the harnessing of space as a global resource. The authors track the growing number of space businesses and opportunities for investors and the many possible benefits of spaceplanes, space stations and even space colonies. The authors also discuss the need for more regulatory reform. Companies like Planetary Resources are now forming to find mineral rich asteroids and bring back new riches to Earth. Solar power satellites in the next few years will start to beam clean energy back to Earth to meet the growing demands of a still developing world. Innovative space industries are vital to the survival of modern human life and the authors demonstrate what can be done to encourage the growing of the New Space frontier. From lassoing and then mining asteroids to developing new methods of defending the planet from space hazards and setting up new hotels and adventures for tourists in space, this new industry will have profound effects on Earth, especially on its economy. This book is based on a study of international experts commissioned ahead of the UNISPACE 50 meeting, having distilled the results of this comprehensive fact-finding process into a compact and very readable form. It can serve as an excellent starting point for understanding all the activities underway or planned to make space truly our next frontier.
