Handbook of Recidivism Risk / Needs Assessment Tools Jay P. Singh, Daryl G. Kroner, J. Stephen Wormith, Sarah L. Desmarais, Zachary Hamilton, 2018-02-05 Provides comprehensive coverage on recidivism risk needs assessment tools. Correctional and healthcare professionals around the world utilize structured instruments referred to as risk needs assessment tools to predict the likelihood that an offender will recidivate. Such tools have been found to provide accurate and reliable evaluations and are widely used to assess, manage, and monitor offenders both institutionally as well as in the community. By identifying offenders in need of different levels of intervention, examining causal risk factors, and individualizing case management plans, risk needs assessment tools have proven invaluable in addressing the public health issue of recidivism. *Recidivism Risk Needs Assessment Tools* brings together the developers of the most commonly used risk needs assessment tools to provide a comprehensive overview of their development, peer-reviewed research literature, and practical application. Written by the leading professionals in the field of risk needs assessment, the book provides chapters on Recidivism Risk Assessment in the 21st Century, Performance of Recidivism Risk Assessment Instruments in Correctional Settings, Correctional Offender Management Profiles for Alternative Sanctions (COMPAS), the Federal Post Conviction Risk Assessment Instrument, the Inventory of Offender Risks, Needs, and Strengths (IORS), the Level of Service Inventory-Revised (LSI-R), the Ohio Risk Assessment System (ORAS), the Self-Appraisal Questionnaire (SAQ), the Service Planning Instrument (SPI), the Static Risk Offender Needs Guide (SRONG), the Offender Group Reconviction Scale (OGRS), the Forensic Operationalized Therapy Risk Evaluation System (FOTRES), the Risk-Need Assessment (RANA), and more. Systematically identifies currently validated recidivism risk needs assessment tools. Reviews research on recidivism risk needs assessment tools used internationally. Each chapter presents sufficient detail to decide whether a given recidivism risk needs assessment tool is right for your practice. *Recidivism Risk Needs Assessment Tools* is ideal for correctional, probation and parole, and behavioral health professionals.

What Works (and Doesn't) in Reducing Recidivism Edward J. Latessa, Shelley L. Johnson, Deborah Koetzle, 2020-06-08 *What Works and Doesn't in Reducing Recidivism* offers criminologists and students an evidence-based discussion of the latest trends in corrections. Experts Latessa, Johnson, and Koetzle translate the research and findings about what works and doesn't work in reducing recidivism into understandable concepts and terms, presenting them in a way that illustrates the value of research to practice. Over the last several decades, research has clearly shown that rehabilitation efforts can be effective in reducing recidivism among criminal offenders, but it is clear that treatment is not a one-size-fits-all approach. Offenders vary by gender, age, crime type, and/or addictions, to name a few, and these individual needs must be addressed by providers. Finally, issues such as leadership, quality of staff, and evaluation efforts affect the quality and delivery of treatment services. While other texts have addressed issues regarding treatment in corrections, this text is unique in that it not only discusses the research on what works but also addresses the implementation issues faced as practitioners move from theory to practice, as well as the importance of staff leadership and evaluation efforts. This book synthesizes the

vast research for the student interested in correctional rehabilitation as well as for the practitioner working with offenders
