## **Old Age And Agency Old Age And Agency:**

*Old Age and Agency* Emmanuelle Tulle, 2004 This book is about rethinking the ways in which we make sense of social action or agency in later life The contributions in this collection challenge traditional academic approaches to the study of later life which arguably often deny older people agency Social gerontology and the wider society should be more reflexive and rather than contribute to the continued marginalisation of older people should draw attention to the extent to which the latter's actions may be understood within the set of normalising discourses which people have to manage and negotiate as they get old The purpose of this collection is to continue this process by providing philosophical theoretical conceptual and empirical direction for a reflexive social gerontology This book argues that the management of later life has become complex caught as it is within a broad discourse which continues to construct old age as a time of decline and dependency but has shifted the burden of responsibility for the avoidance of decline on individuals *Old Age in Ancient Judaism, Early Christianity, and Their Contexts* Albertina Oegema, Seth A. Bledsoe, 2025-08-08

The collection of chapters in this volume explores the significance of old age for Jews and Christians as well as Greeks and Romans in antiquity By examining a diverse range of sources the authors in this volume elaborate on the manifold ways that old age functioned as a social discourse in ancient Jewish Christian Greek and Roman contexts The discussions herein demonstrate how perceptions of old age were closely intertwined with notions of authority and wisdom gender and social dynamics social and familial anxieties and the body and disability They show that conceptualizations of old age are far more prevalent and significant to ancient social and political structures rhetorical discourse and religious imagination than one might expect By including studies on old age in different religious and cultural contexts the volume highlights the commonalities as well as the many differences that existed among various communities in antiquity This volume is of interest for students and scholars of religion particularly for those working on Jews Christians Greeks and Romans in the ancient Mediterranean as well as scholars in classical studies and ancient history It is also a valuable resource for gerontologists who wish to explore the historical background of present day notions of old age **The Many Faces of Health, Competence and Well-Being in Old Age** Hans-Werner

Wahl, Herrmann Brenner, Heidrun Mollenkopf, Dietrich Rothenbacher, Christoph Rott, 2006-03-14 The main aim of the book is to provide an interdisciplinary treatment of a set of key issues of current ageing research i.e. health competence and well-being These key issues are addressed based on three converging research streams social ecological research which assumes that major processes and outcomes of ageing such as day to day competence are shaped by social and physical spatial environments geropsychology research which is driven by a life span developmental conception of ageing and epidemiology which offers most fundamental disease function and prevention related data Each of the three major research directions are outlined by a short introduction followed by three chapters treating in an empirical manner most recent key research questions All chapters are then also discussed by renowned ageing experts This volume links ageing research with policy

considerations and implications and establishes a link between European research and the knowledge base of the international scientific community concerned with ageing This book will be of great interest to scholars and graduate students in ageing research in the social and behavioural field as well as in epidemiology geriatrics geropsychiatry demography and biogerontology *Personhood, Identity and Care in Advanced Old Age* Paul Higgs, Chris Gilleard, 2016-10-05 How do we sustain agency and identity amidst the frailty of advanced old age What role does care play in this process Pushing forward new sociological theory this book explores the theoretical and practical issues raised by age and infirmity It begins with a theoretical examination of the fourth age interrogating notions of agency identity and personhood as well as the impact of frailty abjection and othering It then applies this analysis to issues of care Exploring our collective hopes and fears concerning old age and the ends of people's lives this is essential reading on one of the biggest social issues of our time
