**Insider Guide to Easy Car Buying: Spend a Tenner Save a Grand** Tony Willard,      Severe Accidents and Other Topics in the RPV Design, 2000 Surender Bhandari, Kenneth K. Yoon, Dominique Moinereau, 2000      *Margaret Atwood and Social Justice* Theodore F. Sheckels, 2022-11-25 Margaret Atwood and Social Justice eventually presents a loose ideology evident in the author's major works of prose fiction It insists however that Atwood is a writer not an ideologue and that therefore this ideology evolves over her career always secondary to her presenting stories and characters and through them ideas Throughout her career Atwood has been concerned about the social injustice experienced by women After expressing concern for the plight of the environment in *Surfacing* and workers in *Life Before Man* Atwood turned quite political in *Bodily Harm* and *The Handmaid's Tale* blending her concern for justice for women with criticism of present day Third World and future right wing governments Atwood then turned inward looking at how those denied justice often do the same to others and turned to history looking at injustice tied to social class She later brought many of her concerns together

in *The Blind Assassin* and especially the three books that comprise the MaddAddam trilogy. Later works such as *The Heart Goes Last*, *Hag Seed* and *The Testaments* add to the picture most fully articulated in *The Blind Assassin* which looks back at the 1930s and the MaddAddam books which look ahead to a future marked by global warming, corporate oppression and pandemic. As argued here, these later books strengthen her indictment of corporations which oppress for the sake of profit and offer her most straightforward recognition that race plays a major role in whether social justice is served or not. Foletta, Jason Henderson, 2016-02-22 With increasing awareness of the urgent need to respond to global warming by reducing carbon emissions and recognition of the social benefits of car-free and car-lite living, more and more city planners, advocates and everyday urban dwellers are demanding new ways of building cities. In *Low Carbon Communities*, authors Nicole Foletta and Jason Henderson examine seven case studies in Europe and the United States that aim explicitly to reduce dependency on cars. Innovative and inspirational, these communities provide a rich array of data and metrics for comparison and analysis. This book considers these low-carbon communities' potential for transferability to cities around the world, including North America.
