Flexible Automation in Japan J. Hartley, 2013-04-09 Much has been said and written about Japan's manufacturing prowess. Most of the comment comes from people who are merely visitors to the country and can be best classified as observers looking in from the outside. Other views come from the Japanese themselves in which the double barrier of culture and language filters out much information that would be of real value to Western industrialists. Neither of these limitations apply to John Hartley who has been resident in Japan for the past five years. He understands the culture, can speak the language and has extensive contacts at the highest level. Therefore he is in a unique position to report on the Japanese scene and its activities in advanced manufacturing technology. This he has been doing on a regular basis to IFS magazines *The Industrial Robot*, *Assembly Automation*, *Sensor Review* and *The FMS Magazine*. Most of the material in this book is from John Hartley's pen and represents his most significant contributions on flexible automation in Japan to these journals over the last three years. It is augmented with a few other articles written by leading authorities on new technology in Japanese manufacturing industry. *Fanuc CNC Custom Macros* Peter Smid, 2004-01-11 CNC programmers and service technicians will find this book a very useful training and reference tool to use in a production environment. Also it will provide the basis for exploring in great depth the extremely wide and rich field of programming tools that macros truly are. **BOOK JACKET**

This new book demystifies this simple yet sophisticated programming tool in an easy to understand tutorial format and presents a comprehensive how to of parametric programming from a user's point of view. Focusing on three of the most popular versions of parametric programming: Fanuc's custom macro B, Okuma's user task 2 and Fadal's macro, the book describes what parametric programming is, what it can do and how it does it more efficiently than manual programming.
