Old Age Journey Into Simplicity:

Old Age Helen Luke, 2010-03 In *Speech of the Grail* storyteller and ceremonialist Linda Sussman explores a new way to speak one that heals and transforms She takes for her guide Wolfram von Eschenbach's epic tale of the Grail showing how it depicts a path of initiation toward healing speech to doing the truth in word and action The Grail The word stirs a deep response in the Western imagination Joseph Campbell called the medieval stories where it is first mentioned the founding myth of Western civilization because according to this mythology there is no fixed law no established knowledge of god set up by prophets or priests that can stand against the revelation of a life lived with integrity in the spirit of its own brave truth Campbell and many other scholars artists and seekers have seen the Western wisdom path disclosed in the image of each knight entering the forest where no one else has made a path The quest is to recover the elusive Grail thereby returning its sustenance to the world The presence of the Grail nurtures an invisible web of relationships that connect individual destiny to service of others and to the earth thereby granting meaning Linda Sussman from her introduction Sussman begins with a beautiful retelling of the story allowing readers to inwardly reproduce the potent inner images of the text Then she shows that it is not so much a path toward perfection as a recovery of the proper relationship with our own imperfections She shows too that it is a path in which male and female aspects work together to overcome evil *Old Age* Helen M. Luke, 2001 In this classic text on aging wisely the renowned Jungian analyst Helen M Luke reflects on the final journeys described in Homer's *Odyssey* Shakespeare's *King Lear* and *The Tempest* and T S Eliot's *Little Gidding* and also on suffering In examining some of the great masterpieces of literature produced by writers at the end of their lives she elucidates the difference between growing old and disintegrating and encourages us to grow emotionally and mentally in this culminating stage of our own lives *Enchanting - Life's Dream Calling* Margrit Eleonore Haid, 2024-01-18 How can the 2nd half of life become a rewarding and enchanting adventure with zest and esprit How can your life dream and the dream that LIFE has of you come true How can this be accomplished despite all the challenges that life and aging present 70plus psychotherapist Margrit E Haid shows in an easy to understand way and in a colourful sequence of topics how the findings of psychotherapy offer inspiring enriching unconventional and encouraging answers to the questions posed above In our highly complex time it is imperative to better understand and consider the interplay of body mind soul and spirit including the unconscious Therefore particular emphasis is placed on the significance of its integration and on the nocturnal dream as an evolutionary map With it also the immense creative capacity inherent in every human being and willpower are of great importance Integrating and embracing all these areas are crucial for an empowering and deeply satisfying 2nd half of life however challenging it may be Besides her own conclusions also well known authors are explored from the fields of psychotherapy consciousness research medicine sociology philosophy quantum physics biology and anthropology such as C G Jung C P Est's Ken Wilber James Hillman Leopold Rosenmayr Danielle Quinodoz Helen Luke Roberto Assagioli Ingrid Riedel Marie Louise v Franz Arnold

Jung and the Jungians on Myth Steven Walker, 2014-04-08 Carl Gustav Jung 1875 1961 was never more insightful and intriguing than when he discussed mythology The key to understanding the Jungian approach to mythology lies in the concept of the image which provides the basis for his theory of the unconscious By emphasizing the image over the word Jungian psychology distinguishes itself dramatically from Freudian Lacanian and other psychologies that stress the task of interpreting the language the words of the unconscious In Jung and the Jungians on Myth Steven Walker carefully leads the reader through the essential lines of thought in Jungian psychology before developing his method for using Jungian ideas to approach mythological texts Whether one is sympathetic toward Jung's ideas or critical of them one will find in Walker's discussion a lucid introduction to Jungian perspectives on myth and psychology Jung and the

Devices of the Soul Steve Talbott, 2007-04-27

Self-forgetfulness is the reigning temptation of the technological era. This is why we so readily give our assent to the absurd proposition that a computer can add two plus two despite the obvious fact that it can do nothing of the sort not if we have in mind anything remotely resembling what we do when we add numbers. In the computer's case the mechanics of addition involve no motivation, no consciousness of the task, no mobilization of the will, no metabolic activity, no imagination. And its performance brings neither the satisfaction of accomplishment nor the strengthening of practical skills and cognitive capacities. In this insightful book, author Steve Talbott, software programmer and technical writer turned researcher and editor for The Nature Institute, challenges us to step back and take an objective look at the technology driving our lives. At a time when 65 percent of American consumers spend more time with their PCs than they do with their significant others, according to a recent study, Talbott illustrates that we're forgetting one important thing: our Selves, the human spirit from which technology stems. Whether we're surrendering intimate details to yet another database, eschewing our physical communities for online social networks, or calculating our net worth, we freely give our power over to technology until he says we arrive at a computer's eye view of the entire world of industry, commerce, and society at large: an ever more closely woven web of programmed logic. Digital technology certainly makes us more efficient. But when efficiency is the only goal, we have no way to know whether we're going in the right or wrong direction. Businesses replace guiding vision with a spreadsheet's bottom line. Schoolteachers are replaced by the computer's dataflow. Indigenous peoples give up traditional skills for the dazzle and ease of new gadgets. Even the Pentagon's zeal to replace boots on the ground with technology has led to the mess in Iraq. And on it goes. The ultimate danger is that in our willingness to adapt ourselves to technology, we will descend to the level of the computational devices we have engineered: not merely imagining ever new and more sophisticated automatons but reducing ourselves to automatons. To transform our situation, we need to see it in a new and unaccustomed light, and that's what Talbott provides by examining the deceiving virtues of technology: how we're killing education, socializing our machines, and mechanizing our society. Once you take this eye-opening journey, you will think more clearly about how you consume technology and how you allow it to consume you. Nothing is as rare or sorely needed in our tech-enchanted culture right now as intelligent criticism of technology, and Steve Talbott is exactly the critic we've been waiting for: trenchant, sophisticated, and completely original.

Devices of the Soul is an urgent and important book. Michael Pollan, author of *The Omnivore's Dilemma*, *A Natural History of Four Meals*, and *The Botany of Desire*, *A Plant's Eye View of the World*, says Steve Talbott is a rare voice of clarity, humanity, and passion in a world enthralled by machines and calculation. His new book *Devices of the Soul* lays out a frightening and at the

same time inspiring analysis of what computers and computer like thinking are doing to us our children and the future of our planet Talbott is no Luddite He fully understands and appreciates the stunning power of technology for both good and evil His cool and precise skewering of the fuzzy thinking and mindless enthusiasm of the technology true believers is tempered by his modesty the elegance of his writing and his abiding love for the world of nature and our capacity for communion with it Edward Miller Former editor Harvard Education Letter Those who care about the healthy and wholesome lives of children can gain much from Steve Talbott s wisdom He examines the need to help children spend more time touching nature and real life and less touching keyboards He eloquently questions the assumption that speeding up learning is a good thing Is after all a sped up life a well lived life Most importantly he reminds all of us that technology is just one part of life and ought not to overshadow the life of self and soul Joan Almon Coordinator Alliance for Childhood One of the most original and provocative writers of our time Steve Talbott offers a rich assortment of insightful reflections on the nature of our humanity challenging our own thinking and conventional wisdom about advances in technology Dorothy E Denning Department of Defense Analysis Naval Postgraduate School Monterey CA Are you experiencing growing unease as computational metaphors have seized our discourse Steve Talbott offers immediate relief You are not losing your mind Chapter after chapter he shows how to draw on the powers of technology without losing your soul or breaking your heart Peter Denning Past President of ACM Monterey California Steve Talbott is a rare writer whose words can alter one s entire perception of the world He is our most original and perceptive defender of the wholeness of life against the onslaught of mechanism Devices of the Soul is written with Talbott s typical grace and clarity It displays a quality hardly found anymore in our high tech culture wisdom Lowell Monke Associate Professor of Education Wittenberg University
