The elemental power of food politics has not been fully appraised Food marketing and consumption were matters of politics as much as economics as England became a market society In times of dearth concatenations of food riots repression and relief created a maturing politics of provisions Over three centuries some eight hundred riots crackled in waves across England Crowds seized wagons attacked mills and granaries and lowered prices in marketplaces or farmyards Sometimes rioters parleyed with magistrates More often both acted out a well rehearsed political minuet that evolved from Tudor risings and state policies down to a complex culmination during the Napoleonic Wars Provision politics thus comprised both customary negotiations over scarcity and hunger and negotiations of the social vessel through the turbulence of dearth Occasionally troops killed rioters or judges condemned them to the gallows but increasingly riots prompted wealthy citizens to procure relief supplies In short food riots worked in a sense they were a first draft of the welfare state This pioneering analysis connects a generation of social protest studies spawned by E P Thompson s essay on the moral economy with new work on economic history and state formation The dynamics of provision politics that emerged during England s social economic and political transformations should furnish fruitful models for analyses of total war and famine as well as broader transitions elsewhere in world history
