Cyclonic

Disasters and Resilience Ashutosh Mohanty, Anupama Dubey, R. B. Singh, 2022-04-19 The Bay of Bengal is prone to tropical cyclones and storm surges as a result of its location and many of the mostly poor people living along the coastal regions of South Asia lose their lives almost every year. These disasters have been particularly devastating and have caused serious damage. During the past five decades the low lying coastal and offshore islands have experienced a tragic history of 50 severe cyclones and storm surges with more than one million victims dead or missing. People accepted and waited for the next disaster as they had no alternatives. Members of the poor families who survived the disasters experienced hard times recovering from damage and the loss of their loved ones. After disasters epidemic diseases arise in the affected areas. Many of the people in distress are also deprived of public services. Providing all sorts of assistance and emergency health preparedness are most essential to overcome such a situation. The causes of these huge casualties have been mainly 1 the high population density of coastal settlements 2 inadequate cyclone shelters in the disaster risk areas 3 lack of awareness of the disaster risk by the vulnerable population 4 deterministic attitudes of people who accept disasters as fate 5 houses that are weakly constructed and 6 underdeveloped central awareness programmes and weather forecast systems. This book is based on an empirical study presenting a timeline analysis of major cyclones and their impacts and consequent losses through the super cyclones in the disaster prone coastal regions of India, Sri Lanka and Bangladesh. This study also investigates resilience mechanisms based on early warning systems, technology applications including GIS and remote sensing, best practices, success stories and case studies that can be used for effective cyclone management and development of a resilience mechanism among coastal communities.

Mapping Power Navroz K. Dubash, 2018-08-22 Electricity is critical to enabling India's economic growth and providing a better future for its citizens. In spite of several decades of reform, the Indian electricity sector is unable to provide high quality and affordable electricity for all and grapples with the challenge of poor financial and operational performance. To understand why *Mapping Power* provides the most comprehensive analysis of the political economy of electricity in India's states. With chapters on fifteen states by scholars of state politics and electricity, this volume maps the political and economic forces that constrain and shape decisions in electricity distribution. Contrary to conventional wisdom, it concludes that attempts to depoliticize the sector are misplaced and could worsen outcomes. Instead, it suggests that a historically grounded political economy analysis helps understand the past and devise reforms to simultaneously improve sectoral outcomes and generate political rewards. These arguments have implications for the challenges facing India's electricity future, including providing electricity to all, implementing government reform schemes and successfully managing the rise of renewable energy.

Negotiating Marginality Mahana Rajakishor, 2019-03-01 Providing a critical ethnography of five different tribal movements fighting against the mega industrialization projects in Odisha India the book presents a thick description of the confrontation of the tribals to the authoritative forces of state domination This confrontation a counter hegemonic discourse is neither antagonistic to change nor anti to development but rather in fact the author argues that the tribals are the subaltern citizens who aspire for not only more material and economic prosperity but also freedom freedom from domination and deprivation The book therefore seeks to answer one important question how do the tribals appropriate marginality in their everyday lives in challenging domination and celebrating their desires wishes anticipations and material prosperity as well as in coping with the ruins of frustration and suffering Drawing on long term ethnographic fieldwork carried over a decade 2006-16 this book provides empirical evidences and conceptual explorations on the resistance of subaltern citizens against domination The author challenges current theories of social movements which claim that a cultural critique of the development paradigm is writ large in the political actions of those marginalized by development tribals who lived in harmony with nature combining reverence for nature with the sustainable management of resources On the other hand questioning the established notion of marginality as a problem the author re visits marginality as a possible site that nourishes the capacity of the tribals to resist and to imagine and create a new world The complexity of tribal politics then cannot be reduced to an opposition between

development and resistance The book therefore persuades us to re examine the politics of representation within the ideology of progressive movements Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka *The Indian Law Reports* India.
