In the late 1930s and early 1940s, a wave of state-sponsored national fitness programs swept Britain and its former settler colonies, laying the foundations for the twentieth century's obsession with fitness. In **Strong, Beautiful and Modern**, Charlotte Macdonald shows how governments encouraged citizens to be healthier and more active and thereby reinforced the cultural ties of the Empire. Alongside these state-sponsored efforts was a growing emphasis from business, the medical establishment and popular culture on the importance of having a better body. At a time when government concern over public health issues such as obesity is once again on the rise, Macdonald offers valuable lessons as to why the first national fitness drive was ultimately a failure. Drawing on extensive research, **Strong, Beautiful and Modern** is a lively investigation into the way people and their governments think about health and well-being and how historical views have shaped our modern life. **Fifty Key Jewish Thinkers** Dan Cohn-Sherbok, 2007-06-11. **Fifty Key Jewish Thinkers** is a panoramic survey of over 2,000 years of Jewish thought, religious and secular, ancient and modern. This is the first extended study in English of Theophrastus' *Characters*, one of the briefest but also most influential works to survive from classical antiquity. Since the seventeenth century, the *Characters* has served as a model and an inspiration for authors as diverse as La Bruyère, Thackeray, George Eliot and Elias Canetti. This study aims to locate Theophrastus and his *Characters* with respect to the political and philosophical worlds of Athens in the late fourth century, focusing on later imitators in order to provide clues to reading the Theophrastan original. Special attention is paid to the problems and possibilities of the *Characters* as testimony to the culture and society of contemporary Athens, integrating the text into the extensive fragments and testimonies of Theophrastus' other writings. The implications for the historian of the elusive humour of the *Characters*, dependent in large measure on the device of caricature, are explored in detail. What emerges is a picture of the complex etiquette appropriate for upper-class citizens in

the home the streets and other public places in Athens where individuals were on display Through their resolutely shaming behaviour the Characters illuminate the honour for which citizens should by implication be striving A key theme of the study is Theophrastus ambivalent position in Athens a distinguished philosopher and head of the Lyceum yet still subject to the disabilities of his metic status

**Theology, Horror and Fiction** Jonathan Greenaway, 2020-12-10 Longlisted for the 2022 International Gothic Association s Allan Lloyd Smith Prize Surpassing scholarly discourse surrounding the emergent secularism of the 19th century Theology Horror and Fiction argues that the Victorian Gothic is a genre fascinated with the immaterial Through close readings of popular Gothic novels across the 19th century *Frankenstein Wuthering Heights Dracula and The Picture of Dorian Gray* among others Jonathan Greenaway demonstrates that to understand and read Gothic novels is to be drawn into the discourses of theology Despite the differences in time place and context that informed the writers of these stories the Gothic novel is irreducibly fascinated with religious and theological ideas and this angle has been often overlooked in broader scholarly investigations into the intersections between literature and religion Combining historical theological awareness with interventions into contemporary theology particularly around imaginative apologetics and theology and the arts Jonathan Greenaway offers the beginnings of a modern theology of the Gothic *New Retro*

**Human Rights After Deleuze** Christos Marneros, 2022-11-03 This book examines the possibility of creating new ways of existing beyond human rights Multiple socio political crises and the dominance of neoliberal and capitalist policies have led legal and political theorists to question the emancipatory promise of human rights and to reconceptualise human rights in theory and practice The possibility of creating new ways of existing beyond human rights has been left significantly under examined until now Having as its starting point the ferocious yet brief critique on human rights of one of the most prominent French philosophers of the 20th century Gilles Deleuze the book argues that Deleuze s critique is not only compatible with his broader thought but that it has the potential to give a new impetus to the current critiques of human rights within the disciplinary borders of legal and political theory The book draws upon Deleuze s broader thought but also radical legal and political theory and continental philosophy In particular it investigates and expands on two of Deleuze s most important notions namely those of immanence and becoming

and their relation to the philosopher's critique of human rights. In doing so it argues that these two notions are capable of questioning the dominant and dogmatic position that human rights enjoy.

**The Oxford Handbook of the Ends of Empire** Martin Thomas, Andrew Thompson, 2018-12-06 The Oxford Handbook of the Ends of Empire offers the most comprehensive treatment of the causes, course and consequences of the ends of empire in the twentieth century. The volume's contributors convey the global reach of decolonization with chapters analysing the empires of Western Europe, Eastern Europe, China and Japan. The Handbook combines broad regional treatments of decolonization with chapter contributions constructed around particular themes or social issues. It considers how the history of decolonization is being rethought as a result of the rise of the new imperial history and its emphasis on race, gender and culture as well as the more recent growth of interest in histories of globalization, transnational history and histories of migration and diaspora, humanitarianism and development and human rights. The Handbook in other words seeks to identify the processes and commonalities of experience that make decolonization a unique historical phenomenon with a lasting resonance. In light of decades of historical and social scientific scholarship on modernization, dependency, neo-colonialism, failed state architectures and post-colonial conflict, the obvious question that begs itself is when did empires actually end. In seeking to unravel this most basic dilemma, the Handbook explores the relationship between the study of decolonization and the study of globalization. It connects histories of the late colonial and post-colonial worlds and considers the legacies of empire in European and formerly colonised societies.

**180 Day Access Global Political Economy** Erin Hannah, What constitutes Global Political Economy? In whose interest is GPE constructed and by whom? How can injustices in GPE best be redressed? **Constant Disconnection** Kenzie Burchell, 2024-08-20 The weight of constant digital connection is the default condition of working life, home life and everyday personal life, driving us to engage more with platforms than with people, a new state of constant disconnection that we cannot

escape Overflowing email inboxes deluges of mobile phone notifications and torrents of social media posts the flow of communication in its abundance is today's individualized interface for interpersonal and professional practices Communication technologies and their use are both the needle and the thread of the wider social tapestry of everyday contemporary life This ever changing communication environment is where the neoliberal economic policies of the West and the commercial imperatives of the platform and data mining industries meet It is where the contradictions they produce can be felt day to day by citizens turned users How does it feel to live at the pressure points of intersecting economic realities and why does it matter Drawing on extensive sociological research Burchell examines how individuals try to manage connection as participation in everyday life and how on a larger scale the ever expanding knowledge communication and data driven economies depend on the very pressures that result from our disparate communication needs With so much time spent managing the pressures of our communication environment we often overlook the way media technologies produce systemic tensions that are reshaping how we interact with each other and what we understand to be social connection today
