

The OKCupid dataset: A very large public dataset of dating site users

Abstract

A very large dataset ($N=68,371$, 2,620 variables) from the dating site OKCupid is presented and made publicly available for use by others. As an example of the analyses one can do with the dataset, a cognitive ability test is constructed from 14 suitable items. To validate the dataset and the test, the relationship of cognitive ability to religious beliefs and political interest/participation is examined. Cognitive ability is found to be negatively related to all measures of religious belief (latent correlations $-.26$ to $-.35$), and found to be positively related to all measures of political interest and participation (latent correlations $.19$ to $.32$). To further validate the dataset, we examined the relationship between Zodiac sign and every other variable. We found very scant evidence of any influence (the distribution of p-values from chi square tests was flat). Limitations of the dataset are discussed.

Keywords: open data, big data, OKCupid, dating site, cognitive ability, IQ, intelligence, scale construction, religiosity, politics, astrology, Zodiac sign

1 Introduction

Despite many years of advocacy of proponents, it is still uncommon for social scientists to publicly share their datasets and even sharing data on request is rare (Krawczyk & Reuben, 2012; Savage & Vickers, 2009; Tenopir et al., 2011; Wicherts et al., 2011). Worse, there is some evidence which indicates that those who refuse to share data upon request make more statistical errors than those who share data (Wicherts et al., 2011). This is doubly problematic because the mistakes cannot be corrected by other researchers. Furthermore, a given dataset may have many uses not all of which are known to those who collected it. Even if they are known, the collectors may not be interested in them (or even interested in hiding the results (Duarte et al., 2015)), or they may simply not have enough time. Whichever it is, if the analyses are not done by the collectors and the data are unavailable to anyone else, the data is not used to its full extent. Because science is usually funded by the public, this wastes an incredible amount of public funds.

The lack of data sharing probably slows down the progress of science immensely because other researchers would use the data if they could. Supporting this, it can be observed that known public datasets enjoy widespread use. For instance, Project TALENT is a very large ($N=440,000$) dataset of American high school students collected in 1960. The dataset is still used by researchers examining questions never conceived of when it was collected. According to Google Scholar (<https://scholar.google.com>), there were 255, 148 and 116 papers published in 2013, 2014 and 2015 that had “project talent” in their text¹, indicating that it can still be useful despite being about 56 years old. For instance, (Dunkel, 2014) used the data to examine the cognitive ability of children by the language spoken by their parents, while Major et al. (2014) examined the linearity of relationships between cognitive ability and personality traits, and Damian & Roberts (2015) examined whether birth order showed relationships to cognitive ability and personality.

Handbook of Computational Social Science, Volume 1 Uwe Engel, Anabel Quan-Haase, Sunny Liu, Lars E Lyberg, 2021-11-10 The Handbook of Computational Social Science is a comprehensive reference source for scholars across multiple disciplines. It outlines key debates in the field showcasing novel statistical modeling and machine learning methods and draws from specific case studies to demonstrate the opportunities and challenges in CSS approaches. The Handbook is divided into two volumes written by outstanding internationally renowned scholars in the field. This first volume focuses on the scope of computational social science ethics and case studies. It covers a range of key issues including open science, formal modeling and the social and behavioral sciences. This volume explores major debates, introduces digital trace data, reviews the changing survey landscape and presents novel examples of computational social science research on sensing, social interaction, social robots, bots, sentiment manipulation and extremism in social media. The volume not only makes major contributions to the consolidation of this growing research field but also encourages growth in new directions. With its broad coverage of perspectives, theoretical, methodological, computational, international scope and interdisciplinary approach, this important resource is integral reading for advanced undergraduates, postgraduates and researchers engaging with computational methods across the social sciences as well as those within the scientific and engineering sectors.

Mastering Spark with R Javier Luraschi, Kevin Kuo, Edgar Ruiz, 2019-10-07 If you're like most R users, you have deep knowledge and love for statistics. But as your organization continues to collect huge amounts of data, adding tools such as Apache Spark makes a lot of sense. With this practical book, data scientists and professionals working with large-scale data applications will learn how to use Spark from R to tackle big data and big compute problems. Authors Javier Luraschi, Kevin Kuo, and Edgar Ruiz show you how to use R with Spark to solve different data analysis problems. This book covers relevant data science topics: cluster computing and issues that should interest even the most advanced users. Analyze, explore, transform, and visualize data in Apache Spark with R. Create statistical models to extract information and predict outcomes, automate the process in production-ready workflows, perform analysis and modeling across many machines using distributed computing techniques. Use large-scale data from multiple sources and different formats with ease from within Spark. Learn about alternative modeling frameworks for graph processing, geospatial analysis, and genomics at scale. Dive into advanced topics including custom transformations, real-time data processing, and creating custom Spark extensions. **Research**

Design Julianne Cheek, Elise Juby, 2023-03-25 Designing research is about making decisions to transform an idea into a plan that can provide answers to a research question. This engaging new text provides a serious but accessible introduction to research design and serves as a guide when designing research or reading the research of others. The authors illustrate how designing research is an iterative and reflexive process in which there is constant thinking through and revisiting of decisions about that design as it develops. **Thick Big Data** Dariusz Jemielniak, 2020-03-25 The social sciences are

becoming datafied The questions once considered the domain of sociologists are now answered by data scientists operating on large datasets and breaking with methodological tradition for better or worse The traditional social sciences such as sociology or anthropology are under the double threat of becoming marginalized or even irrelevant both from new methods of research which require more computational skills and from increasing competition from the corporate world which gains an additional advantage based on data access However unlike data scientists sociologists and anthropologists have a long history of doing qualitative research The more quantified datasets we have the more difficult it is to interpret them without adding layers of qualitative interpretation Big Data therefore needs Thick Data This book presents the available arsenal of new methods and tools for studying society both quantitatively and qualitatively opening ground for the social sciences to take the lead in analysing digital behaviour It shows that Big Data can and should be supplemented and interpreted through thick data as well as cultural analysis Thick Big Data is critically important for students and researchers in the social sciences to understand the possibilities of digital analysis both in the quantitative and qualitative area and to successfully build mixed methods approaches

Modern Data Science with R Benjamin S. Baumer, Daniel T. Kaplan, Nicholas J. Horton, 2021-04-13 From a review of the first edition Modern Data Science with R is rich with examples and is guided by a strong narrative voice What's more it presents an organizing framework that makes a convincing argument that data science is a course distinct from applied statistics The American Statistician Modern Data Science with R is a comprehensive data science textbook for undergraduates that incorporates statistical and computational thinking to solve real world data problems Rather than focus exclusively on case studies or programming syntax this book illustrates how statistical programming in the state of the art R RStudio computing environment can be leveraged to extract meaningful information from a variety of data in the service of addressing compelling questions The second edition is updated to reflect the growing influence of the tidyverse set of packages All code in the book has been revised and styled to be more readable and easier to understand New functionality from packages like sf purrr tidymodels and tidytext is now integrated into the text All chapters have been revised and several have been split re organized or re imagined to meet the shifting landscape of best practice

An Introduction to Statistics and Data Analysis Using Stata® Lisa Daniels, Nicholas Minot, 2025-01-10 An Introduction to Statistics and Data Analysis Using Stata From Research Design to Final Report Second Edition provides an integrated approach to research methods statistics and data analysis and interpretation of results in Stata Drawing on their combined 25 years of experience teaching statistics and research methods authors Lisa Daniels and Nicholas Minot frame data analysis within the research process identifying gaps in the literature examining the theory developing research questions designing a questionnaire or using secondary data analyzing the data and writing a research paper so readers better understand the context of data analysis Throughout the text focuses on documenting and communicating results so students can produce a finished report or article by the end of their courses The Second Edition has been thoroughly updated with all new articles and data including coverage of ChatGPT COVID 19 policies and SAT scores to demonstrate the relevance of data analysis for students A new chapter on advanced methods in regression analysis allows instructors to better feature these important techniques Stata code has been updated to the latest version and new exercises throughout offer more chances for practice

Telling Stories with Data Rohan Alexander, 2023-07-27 The book equips students with the end to end skills needed to do data science That means gathering cleaning preparing and sharing data then using statistical models to analyse data writing about the results of those models drawing conclusions from them and finally using the cloud to put a model into production all done in a reproducible way At the moment there are a lot of books that teach data science but most of them assume that you already have the data This book fills that gap by detailing how to go about gathering datasets cleaning and preparing them before analysing them There are also a lot of books that teach statistical modelling but few of them teach how to communicate the results of the models and how they help us learn about the world Very few data science textbooks cover ethics and most of those that do have a token ethics chapter Finally reproducibility is not often emphasised in data science books This book is based around a straight forward workflow conducted in an ethical and reproducible way gather data prepare data analyse data and communicate those findings This book will achieve the goals by working through extensive case studies in terms of gathering and preparing data and integrating ethics throughout It is specifically designed around teaching how to write about the data and models so aspects such as writing are explicitly covered And finally the use of GitHub and the open source statistical language R are built in throughout the book

Key Features Extensive code examples Ethics integrated throughout Reproducibility integrated throughout Focus on data gathering messy data and cleaning data Extensive formative assessment throughout

Pearls of Power Charles

Lewis, 2022-05-09 *Pearls of Power* reviews the social science that explains our implicit instinctual appraisal of people and how these subliminal automatic appraisals influence choices in elections and in the workplace in the selection of leaders. This book focuses on a limited but critical aspect of leadership: how to get the role. It is not a book on leadership skills but rather on how to look that part as this is essential for gaining access to leadership roles. Citing hundreds of scientific studies, Dr. Lewis explains how subtle characteristics in the candidate's appearance affect voter behavior sufficiently to move election results by several percentage points enough to swing most competitive elections. These same characteristics influence how we are perceived in the workplace and greatly impact hiring and promotion into leadership roles. *Pearls of Power* then outlines the steps a candidate can take to improve the way they are perceived by others and how to make subtle changes in their appearance that increase the perception of competence, capacity, and strength. Since most voters never meet the candidate, photos have a crucial influence on elections. *Pearls of Power* describes how different camera lenses, lighting, and camera angle can change how we are perceived and how different persons can highlight or minimize aspects of their appearance to best present themselves. Although any political or job candidate may benefit from the advice provided in *Pearls of Power*, it is written with women in mind. There are chapters on how to use cosmetics, jewelry, accessories, and on hair and clothing styles that best present the candidate. The book provides guidance on how the candidate can best present themselves when interviewed on radio or television and gives advice on what not to wear on live camera. *Pearls of Power* counsels the reader on how they can develop a persona with executive presence so that others perceive them as leaders in order to give the reader a greater voice and more powerful role both in society and in their careers. *Intelligent Computing & Optimization* Pandian Vasant, Gerhard-Wilhelm Weber, José Antonio Marmolejo-Saucedo, Elias Munapo, J. Joshua Thomas, 2022-10-20 This book of Springer Nature is another proof of Springer's outstanding and greatness on the lively interface of Smart Computational Optimization, Green ICT, Smart Intelligence, and Machine Learning. It is a Master Piece of what our community of academics and experts can provide when an Interconnected Approach of Joint Mutual and Meta Learning is supported by Modern Operational Research and Experience of the World Leader Springer Nature. The 5th edition of International Conference on Intelligent Computing and Optimization took place at October 27-28, 2022 via Zoom. Objective was to celebrate Creativity with Compassion and Wisdom with researchers, scholars, experts, and investigators in Intelligent Computing and Optimization across the planet to share knowledge, experience, innovation, a marvelous opportunity for discourse and mutuality by novel research, invention, and creativity. This proceedings book of ICO 2022 is published by Springer Nature Quality Label of wonderful *Privacy and Data Protection Challenges in the Distributed Era* Eugenia Politou, Efthimios Alepis, Maria Virvou, Constantinos Patsakis, 2021-10-22 This book examines the conflicts arising from the implementation of privacy principles enshrined in the GDPR and most particularly of the Right to be Forgotten on a wide range of contemporary organizational processes, business practices, and emerging computing platforms and decentralized

technologies Among others we study two ground breaking innovations of our distributed era the ubiquitous mobile computing and the decentralized p2p networks such as the blockchain and the IPFS and we explore their risks to privacy in relation to the principles stipulated by the GDPR In that context we identify major inconsistencies between these state of the art technologies with the GDPR and we propose efficient solutions to mitigate their conflicts while safeguarding the privacy and data protection rights Last but not least we analyse the security and privacy challenges arising from the COVID 19 pandemic during which digital technologies are extensively utilized to surveil people s lives

A Social Strategy Mikolaj Jan Piskorski, 2016-02-23 What people get out of social media and how businesses can get more out of it Almost no one had heard of social media a decade ago but today websites such as Facebook Twitter and LinkedIn have more than 1 billion users and account for almost 25 percent of Internet use Practically overnight social media seems indispensable to our lives from friendship and dating to news and business What makes social media so different from traditional media Answering that question is the key to making social media work for any business argues Miko aj Piskorski one of the world s leading experts on the business of social media In A Social Strategy he provides the most convincing answer yet one backed by original research data and case studies from companies such as Nike and American Express Drawing on his analysis of proprietary data from social media sites Piskorski argues that the secret of successful ones is that they allow people to fulfill social needs that either can t be met offline or can be met only at much greater cost This insight provides the key to how companies can leverage social platforms to create a sustainable competitive advantage Companies need to help people interact with each other before they will promote products to their friends or help companies in other ways Done right a company s social media should benefit customers and the firm Piskorski calls this a social strategy and he describes how companies such as Yelp and Zynga have done it Groundbreaking and important A Social Strategy provides not only a story and data driven explanation for the explosion of social media but also an invaluable concrete road map for any company that wants to tap the marketing potential of this remarkable phenomenon

The Cambridge Handbook of Consumer Privacy Evan Selinger, Jules Polonetsky, Omer Tene, 2018-04-02 Businesses are rushing to collect personal data to fuel surging demand Data enthusiasts claim personal information that s obtained from the commercial internet including mobile platforms social networks cloud computing and connected devices will unlock path breaking innovation including advanced data security By contrast regulators and activists contend that corporate data practices too often disempower consumers by creating privacy harms and related problems As the Internet of Things matures and facial recognition predictive analytics big data and wearable tracking grow in power scale and scope a controversial ecosystem will

exacerbate the acrimony over commercial data capture and analysis The only productive way forward is to get a grip on the key problems right now and change the conversation That s exactly what Jules Polonetsky Omer Tene and Evan Selinger do They bring together diverse views from leading academics business leaders and policymakers to discuss the opportunities and challenges of the new data economy *The Oxford Handbook of Research Ethics* Ana S. Iltis,Douglas MacKay,2024 The development of new pharmaceutical products and behavioral interventions aimed at improving people s health as well as research that assesses the efficacy and cost effectiveness of public policies such as policies designed to improve children s education or reduce poverty depends on research conducted with human participants It is imperative that research with human subjects is conducted in accordance with sound ethical principles and regulatory requirements Featuring 45 original essays by leading research ethicists The Oxford Handbook of Research Ethics offers a critical overview of the ethics of human subjects research within multiple disciplines and fields including biomedicine public health psychiatry sociology political science and public policy **Handbook of Research on Academic Libraries as Partners in Data Science Ecosystems** Mani, Nandita S.,Cawley, Michelle A.,2022-05-06 Beyond providing space for data science activities academic libraries are often overlooked in the data science landscape that is emerging at academic research institutions Although some academic libraries are collaborating in specific ways in a small subset of institutions there is much untapped potential for developing partnerships As library and information science roles continue to evolve to be more data centric and interdisciplinary and as research using a variety of data types continues to proliferate it is imperative to further explore the dynamics between libraries and the data science ecosystems in which they are a part The Handbook of Research on Academic Libraries as Partners in Data Science Ecosystems provides a global perspective on current and future trends concerning the integration of data science in libraries It provides both a foundational base of knowledge around data science and explores numerous ways academicians can reskill their staff engage in the research enterprise contribute to curriculum development and help build a stronger ecosystem where libraries are part of data science Covering topics such as data science initiatives digital humanities and student engagement this book is an indispensable resource for librarians information professionals academic institutions researchers academic libraries and academicians
