African Bargaining Power with China

Christina Seyfried,2023-06-26 This book provides a detailed account of the political economy around investment deal negotiations between African governments and private Chinese investors The book draws on evidence from experiments and hundreds of interviews with policy makers and Chinese investors across Nigeria South Africa Kenya Ethiopia and Tanzania It shows that governments of authoritarian or one party dominant states which are among the top receivers of Chinese investments are able to easily and successfully act collectively to impose human capital and technology transfer requirements The book argues that rather than treating African countries as price takers in the face of increasing Chinese influence in the continent we should instead recognise the significant bargaining leverage that many African governments have to influence deal conditions especially with smaller private Chinese companies It demonstrates that several African governments can instead act as price setters and that the success of the rising Chinese presence in Africa and whether this leads to positive or negative development outcomes fundamentally depends on the development strategies that individual African governments decide on In the context of an often polarised debate the original research presented in this book has important implications for the future economic development strategies of African countries As such it will be of interest to researchers working on Chinese and African investment politics institutions business economics and international relations **OECD Economic Outlook, Volume 2018 Issue 1** OECD,2018-06-21 The OECD Economic Outlook is the OECD s twice yearly analysis of the major economic trends and prospects for the next two years The Outlook puts forward a consistent set of projections for output employment prices fiscal and current account balances Coverage is provided for all OECD member **Second International Handbook of Urban Education** William T. Pink,George W. Noblit,2017-01-06 This second handbook offers all new content in which readers will find a thoughtful and measured interrogation of significant contemporary thinking and practice in urban education Each chapter reflects contemporary cutting edge issues in urban education as defined by their local context One important theme that runs throughout this handbook is how urban is defined and under what conditions the marginalized are served by the schools they attend Schooling continues to hold a special place both as a means to achieve social mobility and as a mechanism for supporting the economy of nations This second handbook focuses on factors such as social stratification segmentation segregation racialization urbanization class formation and maintenance and patriarchy The central concern is to explore how equity plays out for those traditionally marginalized in urban schools in different locations around the globe Researchers will find an analysis framework that will make the current practice and outcomes of urban education and their alternatives more transparent and in turn this will lead to solutions that can help improve the life options for students historically underserved by urban schools **The Chinese Economy and its Challenges** Charles C.L. Kwong,2019-12-09 The remarkable transformation of the Chinese economy in terms of its structure and growth has drawn unprecedented attention from academics policy makers and businessmen alike In the past four decades China swiftly transformed from a centrally planned to a market oriented economy with an economic size just behind

the US and ahead of Japan Amid commendations for China's economic success offering valuable reform and growth lessons to other developing countries underlying challenges have been emerging which constitute long term risks in shaking China's sustainable success These challenges encompass a wide range of sectors and issues such as the rural urban divide state monopoly policy loans in the banking sector lack of skilled and sophisticated workers environmental degradation etc This book unveils the risks and challenges embedded in China's spectacular economic success and demonstrates that effective handling of these challenges is vital for China to avoid falling into the middle income trap It is elucidated that feasible solutions are available to accommodate these risks and the clue of success lies on the willingness and ability of China's central leaders to implement further reforms This book is a valuable reference for undergraduate and postgraduate students academics and public and business policy makers who are concerned about the current status and future development of the Chinese economy

OECD Food and Agricultural Reviews Innovation, Agricultural Productivity and Sustainability in China OECD,2018-10-04 The expansion of agricultural production in China has been remarkable but at the expense of the sustainable use of its natural resources To counter this as well as to face problems due to rising labour costs and a rapidly ageing rural population agricultural production must concentrate on a

Red Flags George Magnus,2018-10-23 A trusted economic commentator provides a penetrating account of the threats to China's continued economic rise Under President Xi Jinping China has become a large and confident power both at home and abroad but the country also faces serious challenges In this critical take on China's future economist George Magnus explores four key traps that China must confront and overcome in order to thrive debt middle income the Renminbi and an aging population Looking at the political direction President Xi Jinping is taking Magnus argues that Xi's authoritarian and repressive philosophy is ultimately not compatible with the country's economic aspirations Thorough and well researched the book also investigates the potential for conflicts over trade China's evolving relationship with Trump and the country's attempt to win influence and control in Eurasia through the Belt and Road initiative
