The Bulletin of Mathematics Books ,1992      **Latin Literature** Gian Biagio Conte,1999-11-19 This history of Latin literature offers a comprehensive survey of the 1000 year period from the origins of Latin as a written language to the early Middle Ages It offers a wide ranging panorama of all major Latin authors      **Guide to French Literature** Anthony Levi,1992 This guide surveys the lives and works of 300 famous French writers Entries are devoted to the primary writers with some entries on important movements literary groups and publications      *Art in France, 1900-1940* Christopher Green,2000-01-01 This study sets developments within the frameworks both of their unstable social political and intellectual world and of the official and independent institutions of art      *The Publishers' Trade List Annual* ,1978      **The Social Production of Art** Janet Wolff,1993-10 In *The Social Production of Art* Janet Wolff shows systematically that the arts can be understood adequate only in a sociological perspective and argues that art is the complex construction of a number of historical factors      **Enriques Surfaces II** Igor Dolgachev,Shigeyuki Kondō,2025-03-25 This book consisting of two volumes gives a contemporary account of the study of the class of projective algebraic surfaces known as Enriques surfaces These surfaces were discovered more than 125 years by F Enriques in an attempt to extend the characterization of rational algebraic curves to the case of algebraic surfaces The novel feature of the present exposition is that no assumption on the characteristic of the ground field is assumed This requirement calls for exploring the geometry of such surfaces by purely geometric and arithmetic methods that do not rely on transcendental methods such as the theory of periods of algebraic surfaces of type K3 which are close relatives of Enriques surfaces Some of the methods use many technical tools from algebraic geometry that are discussed in Volume 1 and will be a useful source of reference for the study of algebraic surfaces over fields of positive characteristic Volume 1 also contains a detailed exposition of the theory of elliptic surfaces over fields of arbitrary characteristic The second volume discusses many new topics for example the theory of automorphisms of Enriques surfaces and the relationships with hyperbolic geometry Together the two volumes contain many examples and an extensive bibliography made up of more than 700 items      Natural Communication Elias Zafiris,2021-03-08 In *Natural Communication* the author criticizes the current paradigm of specific goal orientation in the complexity sciences and proposes an alternative that envisions a fundamental architectonics of communication His model of natural communication encapsulates modern theoretical concepts from mathematics and physics in particular category theory and quantum theory From these fields it abstracts precise concepts such as to constitute a terminological basis for this theory which offers the opportunity to open up novel ways of thinking about complexity The author is convinced that it is only possible to establish a continuity and coherence with contemporary thinking especially with respect to complexity through looking into the past      *A Critical Bibliography of French Literature* H. Gaston Hall,1983-02-01 Richard A Brooks general editor v      **Between the Ancients and Moderns** ,      *A Reference Guide for English Studies* Michael J. Marcuse,1990-01-01 This text is an
