Roberts, 2015-02-23 If you read technology news you ll notice it s not just a Application story of amazing new product introductions or even that plus copycat product introductions All the usual aspects of business are there fierce competition new contenders old survivors great ideas but business failures mediocre ideas that somehow seem to succeed and prosper As a reporter commentator and blogger on mobile technology I ve collected what happened in the industry in 2014 and make predictions on what will and won t happen in 2015 You can read what did happen in the mobile technology in 2014 Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement This way you can dive into any detail level you desire read my news feed for the overview or follow the related web link to the longer article History is moving so fast now that it is all recorded electronically but I m surprised no one else has collected it and presented it for consideration Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed It's often overlooked that the technology industry is an industry By that I mean its main concerns are profit and growth As consumers we love the new products and unique abilities we are gaining from technology but it is a business akin to any other trying to seduce us to pry money out of our wallets So I cover the horse race aspect of the business who s up who s down Is that changing Is that likely to change The longer implications of what the technology industry is doing are vast and social We are moving to an always on always connected society where we can communicate with someone instantly and find an answer to any question quickly The entire database of human knowledge is now available in the palm of your hand whenever you desire it Everything is there the good the bad right and wrong hate and love music and noise We are obsessed with technology not in and of itself but as a means to an end Technology is the means to satisfy our curiosity or even our desire for self expression. We are taking photos machine gun style with our smartphones and choose the few to share As humans we are gathering ever more data about

ourselves and sharing more about ourselves than we probably thought possible Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years He gave some boring answer about Moore's Law but the real answer is that computers are in their teenage years. They are growing and growing They will not always do so So too the technology industry is in a state of rapid change I see the shift to smaller devices as a new paradigm smashing some businesses and growing others into giants Their stories are here in the news In short here are predictions for what won t and will happen in 2015 for the mobile technology industry breakdowns of marketshare figures on the horse race aspect of the business chapters on Apple Samsung Google Microsoft Nokia Blackberry Amazon Yahoo news about social media giants Facebook Twitter Google LinkedIn Foursquare SnapChat and the carriers themselves Verizon AT T Sprint andT Mobile You can also review my 2014 mobile predictions and see my track record on predictions Finally there are some essays on how all this mobile tech is figuring into our lives I ve divided the news into the subjects it covers but also put in the appendix all the news as it came out in chronological ordering You can read the firehose of events in the appendix or just read about one topic at a time in the earlier chapters 5 Years of Must Reads from HBR: 2021 Edition (5 Books) Harvard Business Review, Michael E. Section 4 Spanish A methodology for getting the most out of this bilingual format is explained in the book s Foreword The primary purpose of this text is to equip a foreign language learner with the ability to start reading news in the particular foreign language to be able to read only in the foreign language and extract enough understanding to continue the language learning process fruitfully this way A reader might like to go back to reading dual language news for reinforcement and further development returning to foreign language only news with a deeper understanding By going back to the same old news you are going over words word patterns and passages with which you already have a certain familiarity The process of reinforcement learning or retaining of what is new and exposure to what is unfamiliar is much easier this way even though the news may seem a little dated The aim of informing the reader about actual news is secondary especially given that the content will become less current and less relevant over time If you are having trouble with the level of difficulty in the text a suggested path for learning languages is as follows Familiarise yourself with a basic language instruction book or re read the one you have Once a student has studied the basics a suitable book about basic grammar can be helpful The suggestion is that any grammar book be studied more with the intent of recognition and understanding rather than memorising and obsessive rote learning Go through as much of the grammar book you feel you can digest maybe even the whole book skipping over what is not easily understood After this read through a portion of text in a book called Spanish Sentences by 2LanguageBooks looking for examples of what you have picked up or gleaned in your hopefully not so arduous study of grammar Even repeatedly seeing a word that you remember seeing listed as a subject pronoun or a third person plural verb of some sort is a great help Then depending on your inclination return to the grammar book or your basic Spanish book or move on to lengthier bilingual text like in 2Language Books texts containing news or stories for example or find some suitable Spanish text a simple novel a Spanish news website etc Grammar books will likely have some verb charts However there are currently good on line resources that go further dictionaries with a verb conjugation search option Many basic language books offer some form of audio support Internet services primarily news based radio stations offer podcasts Audio from television is an additional resource and can be formatted for use on various digital platforms However if audio is an important component of your interest in languages electronic devices that support quality text to speech TTS will likely be appealing With a library card TTS technology in a device that supports the relevant content and the above mentioned resources an entire language learning system is available for not much more than a cup of coffee There is no substantial financial outlay to get you started Furthermore there are no additional ongoing fees and updates and there are no expiry dates on premium content and resources A Dual Language Book Project 2Language Books Communication, Management and Information Technology Marcelo Sampaio de Alencar, 2016-11-03 Communication Management and Information Technology contains the contributions presented at the International Conference on Communication Management and Information Technology ICCMIT 2016 Cosenza Italy 26 29 April 2016 organized by the Universal Society of
